From PETER HENDERSON @ CO. NEW YORK

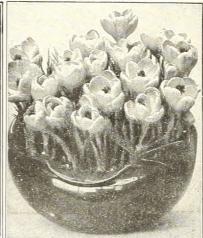

BETTER THAN SOIL FOR BULBS AND PLANTS REQUIR-ING NUTRITION FOR ONLY A FEW MONTHS.

HYACINTH GROWN IN FIBRE

TULIPS GROWN IN FIBRE.

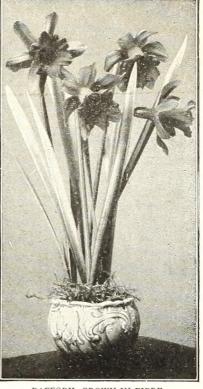

Henderson's Prepared HOLLAND FIBRE

A SUPERIOR SUBSTITUTE FOR POTTING SOIL

An excellent modern medium in which to grow and flower bulbs during winter in bowls, jardineres, fern dishes. etc., without drainage. Always sweet, clean to handle, no drip to soil furniture or carpets, no worms. The most charming way of growing bulbs for the house.

A BOON FOR TOWNS-PEOPLE WHO HAVE DIFFL-CULTY IN GETTING GOOD POTTING SOIL.

Full directions and many cultural hints are given in our booklet "How to Grow Bulbs in Henderson's Prepared Fibre," free to customers when asked for.

Henderson's Prepared Fibre is composed of disintegrated Holland peat fertilized and blended with pulverized charcoal, and crushed oyster shells It furnishes in an assimilable form all of the plant food elements needed by bulbs and in fact almost all plants requiring nutrition for not over 6 to 9 months. For fern dishes, hanging baskets, window boxes and most potted plants for house decoration during the winter it is a boon for it does not "dry out" as quickly as soil nor will it get water logged nor sour if too much water be given and it does not harbor insects nor worms. It is light, clean, nice to handle, odorless, always remains sweet and if used as directed it retains just the right amount of moisture to encourage healthy, luxuriant growth and perfection of bloom.

But perhaps the crowning merit of Henderson's Prepared Fibre is the charming effect produced by bulbs flowering in fancy bowls, fern dishes, small jardineres or other receptacles without drainage holes in the bottom so they can be placed anywhere without danger of soiling anything from drip. One lady sends us photographs, one showing "Paper white" narcissus fibre grown in a glass jar. She says "I like to watch the root development" the other photo shows a splendid hyacinth in a fancy teapot. Showing that almost anything may be utilized for the purpose though we can furnish special Bulb Bowls

Almost any of the spring flowering buibs may be grown in Henderson's Prepared Fibre but we specially recommend Roman, Dutch and Grape hyacinths. Early flowering tulips, narcissus, jonquils, lily of the valley pips after ripened by frost or cold storage. Crocus, chionodoxas, callas, freesias, spireas, scillas, snowdrops, allium neapolitanum, spanish iris, etc.

Success in flowering bulbs in fibre, however, as in soil, depends upon proper treatment, i.e., fill the vase or bowl to a little below the rim with moistened

fibre not so wet that water can be squeezed out-plant the bulbs in it, the tops just showing above the surface. Do not press the bulbs down too firmly or they may be forced up when they commence to throw out roots. The bulbs may be spaced so they almost touch. After planting, which should be done soon after the bulbs are received, they should be placed to make roots in a dark cool airy place as a cellar, outhouse or cool garret-not in a confined closet. It requires about 8 weeks to develop the root system sufficiently to produce best flowers. The fibre must be kept moist all the time, but not sodden, particularly before the bulbs have made enough root growth to absorb the moisture. If too much water by accident be given, tip the bowls on their side and drain

Where garden space or cold frames are available the following method of caring for the bulbs while making roots is less troublesome and furnishes more desirable and uniform conditions, i.e., place the potted bulbs in a trench or cold frame and cover them over 3 or 4 inches deep with soil, ashes, leaf mould or similar material. If exposed to the autumn rains no further attention need be given to the moisture problem, but if not exposed to the weather the bowls should be examined twice a week and the fibre kept uniformly damp.

When the bulbs have rooted and made some top growth they may be taken into the house to develop foliage and flowers; by taking them in at intervals of ten days or two weeks a succession of bloom may be enjoyed throughout the winter if a sufficient number be provided. When removed to the house place near the light in a cool room free from drying furnace heat. A temperature of 50° to 60° produces the best flowers.

Growing bulbs in Henderson's Prepared Fibre is an easy and most interesting method and the effect when in flower is charming.

PRICES OF HENDERSON'S PREPARED HOLLAND FIBRE.

IF YOU WANT BEAUTIFUL BULBOUS FLOWERS

In your house next Winter or in your garden next Spring

YOU MUST HENDERSON'S FLOWER BULBS THIS FALL.

The greatest selection of varieties and the highest quality imported into America from Holland, Italy, France, Great Britain Asia Minor, China, Japan, Bermuda, etc.

BULBS FOR FLOWERING IN THE HOUSE AND GREENHOUSE.—There is no class of plants that give more satisfaction for this purpose than bulbous plants (bulbs), and with so little skill gives such magnificent results. They are easily managed, and need occupy no space in the window or greenhouse excepting when in bud and bloom. Under suitable treatment they flower with great certainty, and their flowering period may be hastened (forced) or retarded so as to "bring them in" for certain occasions, or to give a continuous succession of bloom.

HARDY BULBS FOR OPEN-GROUND PLANTING.—A great many kinds of bulbs are hardy enough to withstand our severe Northern winters. Most of the suitable sorts should be planted in the fall, and they will flower the following season, commencing in March or earlier with Snowdrops, Chionodoxas, Scillas, Crocus, Aconites, Bulbocodiums, etc., which are followed in April with Hyacinths, Tulips, Daffodils, and hosts of other bulbous beauties. In May appear late Tulips, late Narcissus, Lily of the Valley, Bleeding Hearts, etc. Again, followed in succession until frost, notably with Paeonias, Iris, Hemerocallis, Lilies, etc.

FOR GEOMETRICAL OR "DESIGN" BEDDING.—The bulbs best adapted are Dutch Hyacinths and Tulips. In this style of bedding the happiest effects are produced by planting solid bright colors in contrast, and in ordering the varieties it is important to select those that will bloom at the same time and are of proper heights.

THE FLOWER GARDEN AND HERBACEOUS BORDER are favorite places for growing most hardy bulbs, and here they seem to thrive and give the most pleasure. They should be planted here and there in little colonies among the hardy plants and shrubs. From the border one does not hesitate to gather flowers daily for the house, for fear of spoiling the effect, as would be the case from design beds. Furthermore, in an herbaceous border bulbs are not disturbed, the foliage remains uninjured until ripe, thus fulfilling its duty assigned by nature of recharging the bulb with new flowers for the next season's display.

BULBS RIGHT IN THE SOD ON THE LAWN present a pleasing picture when in bloom, in the early spring. They should be planted in a "hit-andmiss" fashion, an irregular group in one place, scattered individuals over there, as one would find wild flowers. Of course, on closely clipped lawns, only very early spring-flowering bulbs can be used, those that flower, ripen and die down before it is necessary to use a mower. Then the summer surface on the lawn will be smooth and green as if no sleeping bulbous beauties were beneath it waiting for their awakening the next spring. The bulbs may be planted with a dibble when the sod is moist and soft after fall rains, but it is better to cut the sod, turn it back, plant the bulbs and press the sod in place.

"NATURALIZING" HARDY BULBS in semi-wild, outlying grounds is a happy style of simulating nature. Such bulbs should be used as can be planted in quantity, from a dozen to a hundred of a kind in a patch. Fortunately, among bulbous plants we have many that are hardy, thrive and increase in such rough neglected, picturesque places even better than in the prim garden.

BULBS (including corms, tubers, rhizomes and pips) are the thickened fleshy subterranean stem ends of bulbous plants. The true or feeding roots grow generally from the base of the bulbs; the stems, flowers and foliage from the crown of the bulb or eyes. A bulb therefore is a storehouse for the plant wherein is formed in embryo—after flowering—new leaves, stems and flowers in fact a complete new plant which is protected and sustained within the bulb by the reserve food and energy collected therein during one season for its successor's requirements during the next growing and flowering period. After which the old plant above the bulb and the roots beneath ripen off and die away. The bulb is then in a "dormant" condition during which period—lasting approximately from three to six months—bulbs are taken out of the ground and transported like so many potatoes easily and safely from Continent to Continent, if required, then replanted after which the incipient roots, stems, foliage and flowers develop with as much luxuriance and perfection—conditions being congenial—as if the bulb had remained in its original environment. This explains why—and it should be remembered when buying bulbs—that you can only make them develop the flowers which were formed within them before they were ripened up. If a young small bulb of Hyacinth only contains six bells in embryo on its embryo stalk, or a Lily of the Valley pip only five bells on its incipient spike, or a narcissus bulb only one flower, no one in flowering them can make them produce any more, though good culture will develop larger and better such flowers as the bulbs contained than poor culture. Consequently where perfection of bloom the rst season is the desideratum, which is usually the case where bulbs are to be "forced" or flowered in the greenhouse or house, then the largest and best bulbs only should be purchased, even if they are higher in price, for best bulbs produce the best flowers. they are higher in price, for best bulbs produce the best flowers.

Superior bulbs—the pick of the crops—are largely consumed by critical European buyers, the "seconds" and "substitutes" being too often palmed off on less critical American dealers. We insist—with a penalty attached—on being supplied with the same high grade—true to name—varieties that the Europeans get, and we see that we get this superior grade by personally conducted trials. We have also excluded from our importations many decadent, obsolete varieties and added their more beautiful and strong-constitutioned successors.

Bulbs and roots mature and ripen at different periods during the late summer and autumn, and shipments will be made as follows in the absence of contrary instructions.

Our September Shipment includes the general line of Bulbs, such as Hyacinths, Tulips, Narcissi, Crocus, Iris, Liliums Candidum, Formosum and Harrisii, Freesias, Peonies and most miscellaneous bulbs.

Our November Shipment includes Lily-of-the-Valley, Spiraea, Gladiolus, Amaryllis, most Lilies, etc.

The ground is sometimes frozen in northern latitudes by the time our November shipments are ready, but, if customers will have the ground covered where the late-maturing sorts are to be planted, with 2 feet of dry leaves, straw or manure, to prevent freezing, the bulbs can be planted with safety when received.

Henderson's Grand New Exhibition Hyacinths.

EXHIBITION HYACINTH

DOUBLEBELLED

The Acme of Perfection in Hyacinth Evolution.

GROWN IN POTS OF SOIL.

GROWN IN BOWLS OF FIBRE.

Henderson's Grand New Exhibition Hyacinths

represent the pinnacle of perfection in hyacinth evolution; the newest, choicest and best productions of Holland's famous hyacinth breeders. They nearly all bear broad thick petalled giant bells on tall handsome well-filled round-topped spikes. The colorings are distinct and superb-some rich and glowing, others dainty and exquisite. We unreservedly recommend them to all who want some superlatively fine hyacinths for winter flowering in the house or for exhibition. The bulbs are all of "top-root" size which in Holland means the pick of the crop, bulbs in which are stored in embryo the maximum number of bells exactly as they are afterwards developed by the purchaser. All being fresh blooded hybrids or sports, they are naturally more healthy and robust than many of the degenerating old varieties and in consequence thrive and flower especially well when grown under artificial conditions either in pots or pans, in soil, or in bowls of Henderson's fibre (see 2d page cover), or in glasses of water. Of course they are equally superior for garden culture where their higher cost can be afforded.

HENDERSON'S GRAND NEW HYACINTHS. In addition to their other superior merits the bulbs have all been ripened and matured by the recently discovered Holland method of treatment, i.e., lifting the bulbs about two weeks before the usual time and storing them on sand, moss or peat in darkened "treating" houses where they are subjected to artificial heat of tropical intensity. It has been proven after several years of experimenting that the incipient flower buds which these bulbs contain develop in greater perfection, are much larger in size, are borne on taller, stronger spikes and come into flower much quicker than bulbs of the same varieties allowed to

Henderson's Superior NAMED DUTCH HYACINTHS.

All "Select First Size Bulbs"—not "Seconds," so often sent out at a lower price.

Hyacinths are among the most popular and satisfactory hardy flower bulbs grown. Their wax-like bell-formed flowers, borne in buxom trusses, are of matchless beauty and also delightfully fragrant. The colors, shades and tints are wonderfully varied, from purest white through blush, pink, rose, etc., to deepest red and from daintiest porcelain through blues to black purple, from cream through yellows to orange and rosy apricot, etc. Hyacinths succeed with every one and may be had in flower throughout the winter, grown either in pots of soil or glasses of water, or in bowls of Henderson's Prepared Fibre (see 2d page cover), while for gardens or bedded on the lawn they are gorgeously effective when in flower during the spring. The bulbs of different varieties of hyacinths vary greatly in size and shape. Some making very large smooth bulbs, others smaller irregularly shaped bulbs. The latter, however, throw equally as fine trusses of bloom—sometimes better—than the larger bulbing varieties. In every case we send out the largest and best bulbs that the variety produces.

Varieties that flower at the same time must also be selected. Varieties prefixed with a * are especially suited for bedding as well as for pot culture. The figures 1,2,3, and 4, after the names of Hyacinths indicate the relative time of flowering—the 1's flower together and are the earliest, the 2's following; No. 4 the latest.

For free delivery in the U.S. within 300 miles of N.Y. add 10c. to 1st doz., then 6c. doz.; within 1000 miles of N.Y. add 18c. to 1st doz., then 15c. doz. over 1000 miles add 30c. to every doz. Single bulbs mailed free.

HENDERSON'S SUPERIOR DOUBLE DUTCH HYACINTHS.

All Select First Size Bulbs, not "Seconds" that may be sold at a lower price.

Double Hyacinths are not as popular as the single-belled varieties for as a class the "doubles" although their individual bells are large and beautiful they do not make as well-filled trusses. For this reason we confine our list of varieties to a few of the very best.

Price, \$2.00. For free delivery in U.S. within 300 miles of N.Y. add 10c., 1000 miles, 18c., over 1000 miles, 30c.

Standard Collection of Twelve Double Flowering Hyacinths.

Contains one First Size Bulb each of the above twelve standard double varieties. Price, \$1.60. For free delivery in U.S. within 300 miles of N.Y. add 10c., 1000 miles, 18c., over 1000 miles, 30c.

Hyacinths Grown in Henderson's Prepared Fibre.

(offered on 2nd page cover) do remarkably well. The advantage of this method is that china or glass bowls, jars, etc. without drainage holes may be utilized, so there is no drip to soil carpet or furniture. The fibre contains all of the plant food elements needed by hyacinths and in consequence the flowers attain full development. The fibre is clean, sweet and nice to handle. Full instructions in our booklet "How to Grow Bulbs in Henderson's Prepared Fibre" free to customers.

HENDERSON'S SPECIAL HYACINTHS FOR BEDDING OF CULTURE

To Color Without Names - Cheaper Than Named Varieties - Far Better Than Mixed

ALL OF

STURDY

GROWTH

Henderson's Special Hyacinths (equally useful for gardens, bedding and borders, or forced for winter flowering in pots or pans) are larger sized bulbs than those put in ordinary mixtures. They are the same age as the first size Named Hyacinth offered by us on pages 4 and 5, from which these are the second selection. They will produce fine spikes of bloom, and the different sorts as offered, being of one shade of color, render them of value for bedding in designs, enabling one to obtain the exact color effect desired which is a great advantage over mixed reds, mixed blues, etc., at but a slight advance in price, and on account of their low price are also extensively forced for winter blooming and cutting.

Plant or pot hyacinth bulbs between September and the last of November—the earlier the better—as it gives them a longer period to make roots before winter sets in and the flowers in consequence will be better developed.

In beds, borders, etc., set the bulbs 5 to 6 inches apart and 4 inches deep measuring from the top of the bulb.

For winter flowering in the house Hyacinths may be grown in pots or pans of soil—1 bulb to a 5-in. pot, 3 bulbs in a 6 or 7-in. pot, 6 or 7 bulbs in an 8-in. pot or pan. The nicest and most successful way however is to grow the bulbs in bowls of "Henderson's Prepared Fibre"—See 2d page cover.

TOGETHER

Winter Flowering in Pots, Pans or Flats Also easily grown in bowls of "Henderson's Prepared Fibre" (offered on 2d page cover).

Roman Hyacinths. Early

Very Short Crop of "White Romans" this year and the Colored ones are a complete failure.

Roman Hyacinths are exceedingly popular and invaluable for winter flowering in the house in pots or pans and are also extensively used for "forcing" for cut flowers. The flowers—smaller than those of the Dutch Hyacinths—are produced in graceful trusses and in greater profusion the larger bulbs throwing four or five spikes of bloom, the smaller bulbs two or three spikes each, and the flowers emit a delicate fragrance. The white Roman Hyacinth is the earliest, best and most floriferous variety, though the pink, rose and light blue are benefitful and expelle a varietiest of selection of colors. are beautiful and supply a variation of color.

They are all easily grown in pots or pans of soil or in fibre. The bulbs—procurable from August to November—if potted in September, the pots plunged in the open ground for a month until the bulbs are well rooted, and then brought in the house can be had in flower in November or December, and from that time throughout the winter a continuous succession of these delightful flowers may be enjoyed by bringing in from the plunge or cellar a pot or two of the rooted bulbs at intervals of about two weeks. In planting in pots, pans or boxes, the bulbs are placed pretty close together—a five-in. pot being sufficient for 3 bulbs, a six-inch pot or pan for 6 bulbs, a seven-inch pot or pan for 8 bulbs. Roman Hyacinths are not hardy enough for open ground planting north of Washington, but where the winters are mild, epecially if lightly protected with mulch they thrive excellently in the garden.

Roman Hyacinths, as well as many other bulbs do wonderfully well when

Roman Hyacinths, as well as many other bulbs do wonderfully well when grown in Henderson's Prepared Fibre (offered on 2nd page of cover). The advantage is that ornamental china bowls, fern dishes or other receptacles may be used without drainage holes so they may be placed anywhere when the bulbs are in bud and flower without danger of soiling carpet or furniture from drip. The Fibre is clean, remains sweet and is nicer to pot with than soil. It contains all of the plant food elements required by most bulbs, and retains an even moisture much longer than soil, so that the bulb's development is not so likely to be checked by "drying out" as often happens with bulbs grown in soil. Full instructions in our booklet "How to Grow Bulbs in Henderson's Prepared Fibre." free to customers on request.

Pink, Blue and Rose Colored Roman Hyacinths cannot be supplied this year account of crop failure. We suggest using the Pan or "Dutch Roman" account of crop failure. We suggest using the Pan or Hyacinths offered below as a substitute.

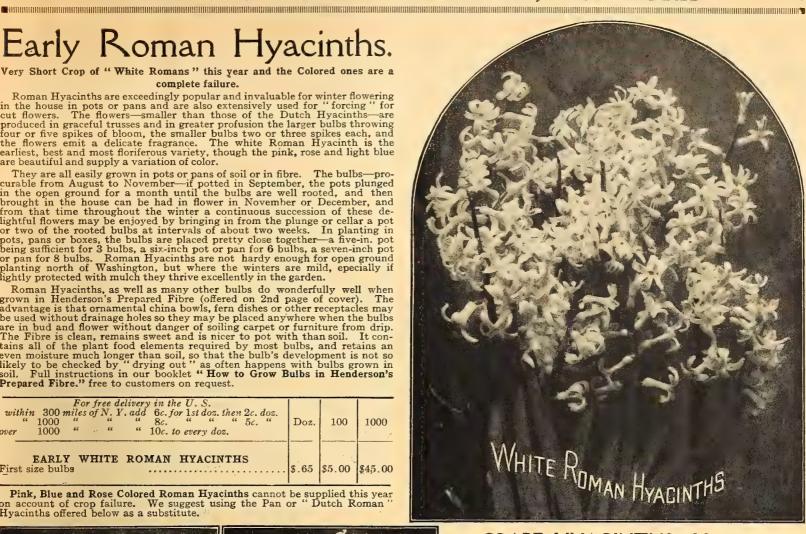

PAN OR "DUTCH ROMAN" HYACINTHS.

The smaller or three year old bulbs of some varieties of Dutch Hyacinths produce considering their size, beautiful spikes of bloom, not as large nor furnished with as many bells as older full sized bulbs but still so satisfactory for their low price that they are extensively grown for winter flowers, forced either in "flats" pans or pots while for culture in bowls of Hendersons Prepared Fibre (offered on 2nd page of cover) they are especially adapted. They may be had in flower from January on—thus succeeding the earlier French Romans. The bulbs may be placed very near together—say \(\frac{1}{2} \) an in. apart—requiring 7 or 8 bulbs for a 7 in. pan or 5 bulbs for a 5 in. pot or pan.

GRAPE HYACINTHS (Muscaria)

These very curious and pretty little Hyacinths are perfectly hardy and of the easiest culture, they thrive and increase in either sunny or partially shaded positions in the garden. When naturalized in colonies where they can remain undisturbed for several years, the effect is very pretty, while as edgings they are most charming. All are also adapted for winter flowering in the house in pots of soil or Henderson's Prepared Fibre.

Note.—Should customers prefer to plant named varieties of single early tulips as offered on following page, selections may be made at the hundred rate for any of the above beds. The following make beautiful combinations: Albion (white), Wouverman (purple) and Golden Queen (yellow); also Rose Lusiante (deep pink) and Albion (white); also Cramoise Brilliant (scarlet) and Chrysolora (yellow); also Prince of Austria (copper red) and Queen of Violets (violet); also Golden Lion and White Hawk. The following are magnificent when bedded by themselves: La Reve, Maes, Pink Beauty Rose Gris de Lin.

HENDERSON'S

Superior Single Early Tulips.

Remember that Henderson's Tulip Bulbs are Selected Largest Flowering size not "seconds" that can be sent out at a lower price,

Tulips are grown more extensively than any other class of hardy spring flowering bulbous plants, thriving almost everywhere either in partial shade or sun and in the confined town plot as well as in spacious gardens. Tulips are planted in groups among the shrubs and herbaceous plants in the hardy border or in front in marginal rows of contrasting colors and in beds of either one color or in designs of contrasting colors. However, utilized they are beautiful effective and doubly appreciated, blooming as they do in early spring and giving the first touch of really brilliant coloring to the remaining somberness of winter. A brilliant garden display may be enjoyed for nearly two months by planting a judicious selection of early, medium and late flowering single and double tulips commencing with the Duc Von Thols, the first to bloom, and ending with the latest of the Cottage and Darwin classes.

A recent happy plan of carpeting tulip beds with dwarf early hardy plants is

with the latest of the Cottage and Darwin classes.

A recent happy plan of carpeting tulip beds with dwarf early hardy plants is now much in vogue, pansies, forget-me-nots, daisies (Bellis), hardy alyssum, arabis cerastium, moss pinks, etc., are the plants mostly used. Young plants of these are set out between the bulbs when the latter are planted in the autumn and form a ground work and effective foil to the tulip flowers as well as lengthen the season of floral display, or dwarf growing hardy bulbs as crocus, scillas, anemones, snowdrops, chionodoxes, etc.—may be used for the same purpose.

Tulip bulbs are planted 4 to 6 inches apart—the minimum distance for solid masses of color—the depth should be according to the soil, in heavy soils 3 to 4 inches to the base of the bulbs, and in light soils an inch or so deeper.

Tulips are also among our most valuable bulbous plants for winter flowering in the house or green house. A five-inch pot will take 3 or 4 bulbs, a six inch pot 5 or 6 bulbs and a seven-inch pot or pan will take 7 or 8.

ROON.O

pot or pan will take 7 or 8.

A very satisfactory and easy way of growing tulips in the house is in "Henderson's" Prepared danger of soiling carpet or furniture from drip. Full directions are given in our Booklet "How to Grow Bulbs in Henderson's Prepared Fibre to customers on request.

HENDERSON'S LEADING BEDDING TULIPS.

Although there are hundreds of varieties of tulips, comprising innumerable colors, shades and combinations of markings and all adapted for garden planting—yet for brilliant bedding effects the solid self colors are usually preferred. For this reason we give a list of the sorts usually chosen for such purpose, that can be sold sufficiently low to enable them to be used in quantity. The letters following the varieties indicate earliness in flowering. The "A's" being earliest; "B's" following; "C's" being still a little later, but come into bloom before the B's are out; the height is indicated in inches to aid in arranging beds.

Henderson's Special Single Early Bedding Tulips to Color without Names.

The following four kinds work well together, flower at the same time, and are in full bloom with us the first week in May; they are all of uniform height, about 12 inches. All are fine flowering sorts, and will give thorough satisfaction to those who hardly know what varieties to combine in design bedding. The bulbs are selected large size, not "seconds," so often sent out at a lower price.

For free delivery in the U.S. within 300 miles of N.Y. add 16 per 100; within 1000 miles, 33 fer 100, and over 1000 miles, 50c. per 100.

HENDERSON'S SUPERIOR Double Early Tulips

Including Beautiful New Varieties.

Remember that our Tulip Bulbs are Selected Largest Size, not "Seconds" so often sent out at a lower price.

HENDERSON'S SUPERIOR DOUBLE EARLY TUI

The letters A,B,C, etc., following the varieties indicate their earliness of bloom, the A's flower together and are the earliest B's follow before the A's are out of bloom, etc. The height is indicated in inches to aid in arranging flower beds.

Double Tulips have massive flowers of brilliant and varied colors, shades and markings and being double, the flowers last much longer in bloom than single varieties and, in consequence when singles and doubles are planted in conjunction the "time of the Tulips" is greatly prolonged. Double

Tulips are beautifully adapted for beds on the lawn, in the garden, and for mingling in clumps of a dozen or more around the edges of shrubbery. When bedded it is generally advisable to use only one variety to a bed for best effect—though the following work well together. Boule de Neige (white). Imperator Rubrorum (scarlet). Crown of Gold (yellow. Salvator Rosa (pink.)

Double Tulip bulbs are planted 5 to 6 inches apart—the minimum distance for solid mass of color—the depth should be according to the soil, in heavy soils 3 to 4 inches to the base of the bulbs and in light soils an inch or so deeper. The early sorts (those indicated by "A" or "B") do splendidly when grown in pots or pans of soil for winter blooming; but must be forced much slower than Single Early Tulips by keeping them cooler. Those marked "A" should not be forced into blocm befoore the middle of January, the "B's" before February and the "C's" before March. The bulbs are potted in the autumn and plunged in the open ground, cold frame or placed in a cool airy cellar, until rooted. By bringing in a few pots at intervals of 10 days or two weeks a succession of bloom may be maintained throughout the winter. A five-inch pot will take 3 or 4 bulbs, a six-inch pot 5 or 6 bulbs and a seven-inch pot or pan will take 7 or 8 bulbs. When "forced" in quantity for cut flowers the bulbs are placed nearly touching each other in-shallow boxes of soil, then treated the same as potted bulbs.

A very satisfactory and easy way of growing tulips in the house is in "Hen-

derson's Prepared Fibre" (offered on 2d page of cover) Full directions are given in our Booklet "How to Grow Bulbs in Henderson's Prepared Fibre" free to customers on request.

Late or "COTTAGE TULIPS." Including Beautiful Novelties.

years or more. Some through neglect had dwindled in size, but their long life and perennial persistence in blooming attracted the attention of some tulip fanciers, who collected every kind available. These when given proper cultivation soon regained their original size and have proven so beautiful that their renaissance is the cause of much enthusiasm among "Tulipists" new "old varieties" being sought, and added to the collection of Cottage Tulips every year. All are very beautiful, presenting a great variety in form and coloring, and have none of the stiffness of other tulips. For cutting

Cottage Tulips, so-called because many of them were found growing in the old cottage gardens of England, Scotland, Ireland and France where they had been established for 50

of Cottage Tulips every year. All are very beautiful, presenting a great variety in form and coloring, and have none of the stiffness of other tulips. For cutting they are greatly prized on account of their long stems and graceful habit. Being extremely hardy they are specially adapted for permanent hardy flower borders, where they should be freely planted in large clumps and masses. They may also be naturalized in grass, wild gardens, etc., where during

May they present a charming picture. To aid in making selections of varieties for continuity of bloom, etc., the relative time of flowering is indicated by the letters E, F, G, H and I. Those marked E being the earliest-just following the C's and D's-of the early single and double tulips offered on the preceding pages. Those marked H and I are the latest to bloom. The normal height is also given in inches. In planting the bulbs should be placed about 5 inches apart and the bottom of the bulb should be 6 to 7 inches below the surface in light soils and 5 to 6 inches deep in heavy soils. If planted too shallow some may come blind. Cottage Tulips may also be grown in pots or pans of soil or fibre and flowered late in the winter, but they must not be brought in from the cold frame or out-door plunge before January and then be grown on cool and slowly—they are impatient of too much heat which is apt to cause the buds to blast or the stems to grow weak and crooked—a temperature not exceeding 55° to 60° until the buds are well developed is conducive to best results. The earlier varieties—those marked E and F can be brought into flower in from 4 to 6 weeks after being brought in the house—the later sorts will require a little longer. The varieties marked * are especially good for winter-flowering and forcing.

NEW GIANT DARWIN TULIPS. ARISTOCRATS

These gorgeous new late or May-flowering tulips are very stately and beautiful-producing immense flowers on tall sturdy stems attaining a height of from two to three feet. The flowers are models of perfection in form, lasting wax-like substance—and in a great variety of both dainty and richly brilliant colorings ranging from blush through pinks, rose, salmon-red, crimson, etc, to rich ox-blood reds, from lavender through mauve, light blue to violet purple, and black. The centers of many of them are beautifully marked. The Darwins also include two or three "near whites"—but clear yellows have not yet been produced. Therefore where the latter color is desired selection should be made from the "Cottage" Tulips offered on pages 14 and 15. The Darwin Tulips are exceedingly effective when grown in groups of a dozen or more bulbs of one variety in the garden or herbaceous border with a back ground of greenery which enhances their magnificence. The beauty, hardiness and perpetuity of the Darwin Tulips is making them very popular. As cut flowers they are unsurpassable. The long-stemmed bold, durable flowers have a dignity and character exclusively their own.

To aid in making selections of varieties for continuity of bloom, etc., we have indicated their relative time of flowering by the letters E, F, G, H and I. The E's being the earliest to bloom, just succeeding the latest of the early single and double Tulips offered on pages 10 to 16. The normal height is also given but may vary according to soil, culture and location. The bulbs should be spaced about 5 inches apart and base of the bulbs should be 5 to 6 in deep on heavy soils and 6 to 7 inches deep on light soils.

Darwin Tulips for Winter Flowering in Pots and Forcing. (See 2d page cover.) Darwin Tulips may be successfully flowered in pots or pans of soil or fibre in the house in winter if not brought in from the cold frame or out-door plunge before the middle of January and then grown on cool and slowly in a temperature of about 60°. The early flowering ones—those marked, E, F and G—will then flower in February and March—the later ones requiring a little more time. Too much heat is apt to cause them to grow spindling and inferior. The varieties marked * are especially good for late wintering flowering and forcing.

Bizarre, Bybloemen and Rembrandt Late or May-Flowering Garden Tulips.

These magnificent late or May flowering garden tulips are all hardy, robust, tall growers, producing large perfectly formed flowers of much substance on strong stems varying from 20 inches to 2 feet in length. They are all adapted for permanent positions and are effective grown in groups of a dozen or more in the hardy border. They are really "rectified" Darwins and Breeders, that is, solid colored varieties of these types that have broken into stripes, flames, blotches and other variegations. The cultural directions, etc., given for the Darwins apply to these.

PAPER WHITE NARCISSUS FORCED IN "FLAT" OF SOIL

CAMPERNELLE JONQUILS GROWN IN FIBRE.

Among spring flowering bulbous plants the narcissus family—which includes Daffodils and Jonquils—is one of the most important and of world-wide popularity. The recent wonderful creations in the way of new varieties having awakened a new interest amounting to enthusiasm with flower lovers. With the exception of the Polyanthus varieties (offered on page 25) all are as hardy as rocks, grow, increase and flower year after year.

They may be grown in garden beds, among hardy plants in herbaceous borders, or "naturalized," that is, grown as if wild in outlying portions of the lawn or grounds, on terraced slopes, stream side banks and along semi-shaded

The early sorts commence blooming in March, some in favored locations even in February. Their waving masses of silver and gold are not only enchantingly beautiful but doubly welcome appearing as they do just after bleak winter. With a selection of mid-season and late flowering kinds an endless succession of bloom may be enjoyed well into May. As cut flowers Narcissus are especially useful being of lasting quality and vasing beautifully.

Narcissus and Daffodils thrive in all ordinary garden soils but grow and flower most luxuriantly in deep moist loam and if they can be grouped in the partial shade furnished in the hardy border of shrubs and herbaceous plants the conditions will be ideal. The bulbs should be planted as early as convenient in the autumn for the longer time they have to make root growth before winter sets in the better the flowers the succeeding spring—though we have planted bulbs as late as December with satisfactory results. The bulbs may be left undisturbed for several years on good loamy soils. The depth to plant varies according to the size of the bulbs—a covering of 2 to 3 inches of soil is about the average—a good rule is to cover the bulb once and half its own depth. On light sandy soils

plant deeper than on heavy soil. according to the size of the variety. The distance apart should be 3 to 6 inches

plant deeper than on heavy soil. The distance apart should be 3 to 6 inches according to the size of the variety.

Narcissus and Daffodils are also valuable for winter flowering in the green house or window being grown in pots, pans and flats of soil or in bowls of fibre. For winter flowering the bulbs should be potted as early as possible in the autumn (for all Narcissus are impatient to start root growth) then the pots should be plunged on a layer of ashes in a frame or trench in the open ground where water will not settle, cover with leaf mould, soil, tanbark, or similar material. No watering will be required unless it should be an unusually dry fall, or the potted bulbs may be placed in a cool airy cellar or out house and be covered in the same way, but here an occasional watering may be required for the soil must not dry out after the roots have started. The potted bulbs of most Narcissus should remain in the plunge for not less than 12 weeks, though some of the earlier flowering sorts—those marked 1 and 2— may be well rooted a couple of weeks sooner. The Polyanthus varieties are usually ready in 8 weeks and the Paper White and Double Roman in 5 to 6 weeks. As long as left in the plunge the bulbs will make but little top growth, advantage is taken of this and by bringing into the house a few pots at intervals of 10 to 14 days a succession of blooming Narcissus may be enjoyed from Christmas throughout the winter.

Always grow Narcissus cool for too much heat is detrimental. A light store room with a temperature not exceeding 50° is advised for a couple of weeks after the bulbs are taken from the plunge then remove to where they are to be flowered where 60° will be ideal and more than 70° is to be deplored.

A very satisfactory and easy way of growing Narcissus, Daffodils and Jonquis in the house for winter flowers is in "Henderson's Prepared Fibre " (offered on 2d page cover). Full directions are given in our booklet "How to grow bulbs in Henderson's Prepared Fibre free to customers on request.

The figures following the name of the variety indicates its relative earliness: (1) 1st early; (2) 2nd early; (3) mid-season; (4) late; (5) very late.

he Ajax Narcissus, or Trumpet Daffodils.

The "Trumpet" section of the Narcissus family is perhaps the most popular of all. They are as hardy as rocks for garden beds and borders and in grass they are unrivalled. The flowers are of large size; the perianth or spreading wing-like petals according to the variety measure from 2½ to 4 inches across and the trumpets vary from 2 to 4 inches in length. The flowers are of much substance, and gracefully poised on long, stiff stalks.

A very satisfactory and easy way of growing daffodils in the house is in "Henderson's Prepared Fibre" (offered on 2d page cover). Full directions are given in our Booklet "How to grow Bulbs in Henderson's Prepared Fibre" free to customers on request.

CUTTING DAFFODILS FOR HOUSE DECORATION AND EXHIBITION.

To obtain very fine blooms Daffodils should be cut in a young state, just when the bud is bursting, placed in water and allowed to expand in a greenhouse or sitting-room. The blooms opened in this way are larger and finer in texture and purer in color than those which develop out of doors.

he Incomparable, Chalice-Cup and Crown Daffodils

These beautiful Daffodils are hybrids. The originals of most of the various family groups being crosses between the large trumpet Daffodils and the small cupped Poeticus, the blood of the latter supplying the red rimmed crowns to be found on some of the varieties in this section. These hybrid Daffodils embrace the greatest variety of forms and range of coloring. They are strong growers, free bloomers, hardy and thrive under garden culture or naturalized; for growing in pots of soil or bowls of fibre for winter flowers, they are splendid, and as cut flowers are greatly prized. The red rimmed varieties sometimes lose their red color in exposed hot sunny locations, therefore should be cut when only half expanded and be allowed to develop in water in the house.

THE INCOMPARABLE DAFFODILS.

NARCISSUS INCOMPARABILIS.

The Incomparabilis Group are garden hybrids between yellow Trumpets and Poeticus. Characteristic: depth of crown 1 to 2 the length of a perianth petal. They are all perfectly hardy, thrive under garden culture or naturalized, and for flowering in the house or green house in winter are unsurpassed. The flowers are all large, often 4 inches across and are borne freely on long stems.

MIXED NARCISSUS AND DAFFODILS.

FOR NATURALIZING IN BORDERS, WILD GARDENS, ETC.

We offer these at exceptionally low prices to encourage liberal plantings. They are very suitable for growing in masses for garden decoration, and are grand for cutting, and are particularly adapted for mixed borders, "naturalizing" in shrubbery by woodland walks, in woods by streams and lakes and semi-wild, outlying grounds. They are perfectly hardy and will flourish and increase for years.

NARCISSUS, DAFFODILS, AND HOW TO GROW THEM.

A new book by A. M. Kirby, who has made a hobby of their culture for many years and whose collection of varieties is probably the most extensive of any in America. The h story, lore, traditional and poetical, is touched upon; wild Narcissus and where found; cultivation in gardens; naturalizing, winter flowering in pots, bowls of water; forcing for cut flowers, hybridizing; distinguishing features of the various family types, with descriptions of all varieties in commerce; also suggestive selections for different purposes, etc.

Price, postpaid \$1.20.

Poet's or "Pheasant's Eye" Narcissus.

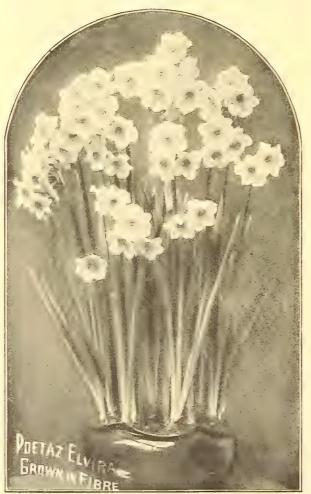

NARCISSUS POETICUS.

This section, Narcissus Poeticus, has instead of a trumpet or crown a small wide mouthed cup. All are hardy as rocks, producing long stemmed fragrant flowers that are prized for cutting. They thrive in gardens, or naturalized in grass or semi-wild places. By mixing the early and late flowering sorts a continuous display of bloom may be enjoyed for weeks.

POLYANTHUS NARCISSUS.

The Polyanthus varieties of Narcissus are not only beautiful but deliciously sweet scented, and of the easiest culture, very free flowering and continuing in long bloom. Their tall spikes of bloom bear from six to one dozen flowers each. The pure white petals and gold cups of some varieties, the yellow with deep orange cups of others and the self whites and yellows render them great favorites. They are not quite so hardy as the other types of Narcissus, and therefore should be carefully protected in cold climate when grown in the garden. South of the freezing belt they are splendid for gardens and "naturalize" well. For growing in pots or pans of soil or bowls of Henderson's Prepared Fibre (see 2d page cover), they are especially adapted and can be had in flower in the house from Christmas throughout the winter by bringing the pots of rooted bulbs in from the frame or cellar every week or two.

Chinese Sacred Narcissus.

The "Shui Sin Far" or Water Fairy Flower, Jos Flower or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus, bearing in profusion chaste flowers of silvery-white, with golden-yellow cups. They are of exquisite beauty and entrancing perfume.

The bulbs, of large size and great vitality, are of luxuriant growth, producing several spikes of flowers; the incredibly short time required to bring bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," succeeding almost everywhere and with everybody. They do well in pots of earth, but are more novel and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the winter. Price, largest true China-grown bulbs, 20c. each; \$2.00 per doz.; \$16.00 per 100.

Crocus flower well in fibre. See 2d page

HIGH GRADE BULBS FOR AUTUMN PLANTING

Spring-Flowering CROCUS.

INCLUDING NEW HYBRID VARIETIES.

Crocus will always be popular on account of their earliness of bloom, Crocus will always be popular on account of their earliness of bloom, hardiness and adaptability to most soils in sunny situations as in the sod, on grassy slopes in the lawn, garden, border, stream side banks, etc. If planted with liberality their masses of color, white, blue, yellow, purple striped, etc., are very cheery and welcome—appearing as harbingers of spring almost before the snow has disappeared. When "naturalized" in grass the bulbs should be planted in irregular colonies or masses the bulbs being strewn by hand to fall thickly in some places then dibble them in where they fall when the turf is moist and soft.

As undergrowth among tuling haveinths, defedding the thousand the same start.

As undergrowth among tulips, haycinths, daffodils, etc., they are very effective—the flowers being over when the other bulbs begin blooming, thus lengthening the floral display and then the crocus foliage forms a beautiful grass like setting for the later flowering bulbs.

As edgings to beds—and bordering walks—lines of different colored crocus are most effective. The bulbs should be planted about 1 inch apart and 2 inches deep. As a new bulb (corm) is formed each year above the old one, which withers away, the Crocus therefore eventually works to the surface of the ground and must be taken up and replanted every few years.

Crocus are also easily flowered in the house in winter, grown in pots and pans of soil or in dishes or shallow bowls of "Henderson's Prepared Fibre" (offered on 2d page Cover) plant the bulbs thickly, almost touching one another and plunge the pots or bowls in the open ground or in frames in ashes, soil or sand up to the rims only. When well rooted remove from the plunge, place in any airy situation, and give water very freely at the roots. They should be kept in any airy room without a fire, where gas is seldom burnt and where they can get plenty of light. When bulbs are coming into bloom they may be brought into the sitting-room.

the sitting-room.

We have discontinued offering the cheap mixtures of Crocus as the larger bulbs—at but little higher price—produce more and larger flowers.

				at but little higher price produce more und target newers.

BERMUDA EASTER LILY.

The short time required to bring this peerless Lily into flower, and the certainty to produce a profusion of bloom, and also the ease with which it can be made to flower at any desired period, such as Christmas, Easter and other special occasions,

flower at any desired period, such as Christmas, Easter and other special occasions, renders this lily invaluable.

The flowers are delightfully fragrant, pure waxy-white, of great substance, and if cut as soon as they are open, or partially open, they can be kept for two weeks. Bulbs potted in September can be had in flower in December, if desired. A succession of bloom can be kept up throughout the winter by bringing in a few pots of bulbs from cold frames at intervals.

Blooming plants in pots form typical Easter offerings and presents for decoration of the window, table, house or church. Nothing is more appropriately beautiful and highly appreciated. Thousands upon thousands are sold in the large cities every winter for this purpose.

As a garden Lily it is of great beauty, being entirely hardy, excepting in Northern climates, where it requires a protection of leaves or litter to the depth of 5 or 6 inches.

inches.

The FORMOSA EASTER LILY

(Lilium Longiflorum Formosum.)

This improved type of the well known L. longiflorum also known as the "Easter or St. Joseph's Lily" comes from the Island of Formosa. The plants are of healthy strong growth—about 3 feet high and produce beautiful snow white trumpet shaped flowers 6 to 8 inches long. It is perfectly hardy and a splendid garden lily blooming in the open in June and July. This lily is also a very important winter flowering type, thousands of the bulbs being imported for Florists and others who "force" them as pot plants and for cut flowers. It is not quite as early as Lilium Harrisii—but for "bringing in" soon after Christmas it is well adapted.

LILIUM LONGIFLORUM GIGANTEUM.

This Japanese type is the latest of all the longiflorum lilies to bloom but is highly thought of for late winter and Easter forcing—though the bulbs of this variety are often carried over in cold storage to be brought into bloom at any desired time the succeeding year. The plant is of sturdy stocky growth—with black marked stems. The flowers of purest white are the largest of the longiflorums—of perfect form and exceptional substance. It is also a splendid garden lily—being perfectly hardy.

HENDERSON'S

Superior Northern Grown Lilium Candidum

(Ready in August.)

Our Lilium Candidums are the thick, broad-petalled type so superior to the narrow-petalled south of France stock. The bulbs are plump, heavy and healthy. This popular, fragrant, snow-white, hardy garden Lily is also known as "Annuciation Lily," and "Madonna Lily." It grows 3 to 4 feet high, and blooms in the open ground in June. Parcel Post weight 4 lbs. doz. Single bulbs mailed free; Price, Mammoth Bulbs, 9 to 11 in., 18c. each; \$1.75 doz.; \$12.00 per 100.

HIGH GRADE BULBS FOR AUTUMN PLANTING

Lilies are matchless among hardy garden plants for stately habit, beauty of form and variety of color. They commence flowering in May, and with the various species maintain a continuous and unbroken succession of bloom until autumn. They are also excellent subjects for the shrubbery border.

Most Lily Bulbs, being of late maturity, are not ready before October and November (the best time to plant them). Where the ground is liable to freeze up before the late lilies arrive it should be mulched with 6 or 8 inches of leaves or manure so the bulbs may be planted on arrival. L. Harrisii, Candidum and Formosum are ready in August.

If by Parcel Post add postage @ Zone Rates. The weight per doz. a given to each variety. Single bulbs mailed free.	Each	Doz.
Auratum. (The Golden Rayed Lily of Japan.) One of the finest an most popular of the hardy garden lilies. It thrives best in location where the lower portion of the plant will be partially sheltered from the hot sun, as among peonies or herbaceous plants in the hard border, where groups of 6 to 12 of these lilies produce a statel and magnificent effect. The flowers are pure white, thickly studde with crimson spots, while through the centre of each petal runs a clear golden band. Fully expanded, the flowers measure nearly a focacross, are produced abundantly from June to October and possess	y y d r	
most delicious fragrance. 3 to 5 feet. (See cut.) First size bulbs. \$12.00 per 100. (Weight: 3 lbs per doz.) Extra size bulbs, \$18.00 per 100. (Weight: 5 lbs. per doz.) Mammoth bulbs, \$25.00 per 100. (Weight: 7 lbs. per doz.) Auratum Platyphyllum. This is without a question one of the mos wonderful Lilies in cultivation. The leaves are very long and broad and the stems attain a height varying from 7 to 10 feet. The flower are similar in color to Auratum, heavily spotted, but are much	.25 .35 t	1.7 5 2.50 3.50

Elegans Auranticum Verum. Clear apricot color without spots or flakes; very fine and effective. (Weight: 1 lb. per doz.)	Φ.30	\$3.00
Golden Gleam. This new yellow sport of L. Tennifolium resembles its parent in habit of growth, freedom of bloom, hardiness and ease of culture—excepting that the flowers are of pure golden yellow and very beautiful; height 18 inches. (Weight: ½ lbs per doz.)	.40	4.00
Hansoni. (The True Japanese Yellow Martagon.) This is one of the best of the Martagon group: unsurpassed in vigor of growth and beauty by any other Lily. The flowers are large, of a bright yellow, tinged orange and spotted maroon, with thick wax-like petals. Very robust and free. (Weight: 1 lb. per doz.)		7.50
Harrisii. (See page 27.)		6.00
Krameri. Distinct from all other Lilies, large flowers of a soft, beautiful rose color; of dwarf growth. (Weight: 2 lbs. per doz.)	.25	2.50
Lancifolium. (See Speciosum.)		
Myriophyllum. A new lily from China and one of the finest of all lilies. It is absolutely hardy, a good "doer," and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future. The flowers are white, slightly suffused with pink and with a beautiful shade of canary yellow at the throat, and extending part way up the trumpet. It is delightfully perfumed. Blooms out-of-doors early in July. 2 to 3 ft. high, 4 to 7 flowers to a stem. (Weight: 3 lbs. per doz.)		10 00
Pardalinum. Scarlet, shading to rich yellow, freely spotted with purple-brown. 3 feet high. July and August. (Weight: 1 lb. per doz.)		2.00
Philadelphicum. Native variety; bright orange-red spotted with purple. Height 1 to 3 feet. Midsummer. (Weight: 1½ lbs. per doz.).		1.50
Speciosum or Lancifolium. The varieties of L. Speciosum or Lancifolium are perhaps the most popular Lilies grown, being easy of cultivation, and produce large flowers of delicate beauty on strong stems; height, from 2 to 4 feet; blooming in August. The varieties are:		
Speciosum Album. White. (Weight: 3 lbs. per doz.); largest bulbs		3.50
Speciosum Rubrum (Roseum). White, shaded and spotted with rose and red. (Weight: 3 lbs. per doz.); largest bulbs	.25	2.50
Speciosum Melpomone. Rich blood-crimson, heavily spotted. (Weight: 4lbs. per doz.); largest bulbs	.25	2.50
double the size of other Speciosum varieties and of taller sturdy growth. It is a close ally of Melpomone but of much larger size and richer coloring: rich red heavily spotted. (Weight: 4½ lbs. per doz.)	.30	3.00
Superbum. (Turk's Cap Lily.) One of our native species. When established in good, rich soil, it will produce upwards of 50 beautiful orange, tipped red, spotted flowers in a pyramidal cluster. 3 to 5 feet high. Blooms in July. (Weight: ½ lb. per doz.)	.15	1.50
Tenuifolium. A miniature Lily having slender stems, 18 inches high, bearing 12 to 20 fiery-scarlet flowers. A gem for cutting, and easily grown in pots or in warm, dry border; early. Mailed free	.15	1.50
Tigrinum Splendens. (Improved Tiger Lily.) The grandest of the Tigers, black polished stem, sometimes 6 feet high. Very large pyramids of flowers, orange red, spotted with black, 3 to 5 feet high. Blooms in August. (Weight: 1 lb. per doz.) \$10.00 per 100.	.15	1.50
Tigrinum Flora Plena. (Double Tiger Lily.) This is a plant of stately habit, growing from 4 to 6 feet high, bearing an immense number of double bright orange-red flowers spotted with black. Blooms in August. (Weight: 1 lb. per doz.) \$10.00 per 100	.15	1.50
Umbellatum. (Davuricum.) One of the very best classes of the hardy garden Lilies; strong sturdy habit, growing from 2 to 3 feet high, having large showy flowers held upright and in clusters of the summit. They are of easy culture, thriving under ordinary garden conditions, flowering in June and July. The colors range through all shades of red from rose to blackish-crimson, yellow, buff, apricot, orange, etc., many being spotted. Mixed colors. (Weight: 2 lbs. per doz.)	15	1.50
Wallacei. This Lily is very floriferous, each bulb throwing up from 4 to 6 flower stems, each one of which is crowned with 8 to 10 beautiful upright blossoms of a delicate, bright apricot color. It is very perfect in form and a most delicate sort. Autumn flowering. (Weight: 2 lbs. per doz.).	.15	1.50

GERMAN IRIS IRIS GERMANICA AND ALLIED SPECIES.

These the true Fleur-de-Lis—but greatly improved—are well termed "Garden Orchids" and they fairly out rival the orchids in wide range of coloring—both in dainty combinations and rich and vivid colors including yellows from light canary to deep golden; blues from soft lavender to intense purples, redsfrom pink—ish mauve to claret and maroon, beautiful bronzes and pure whites then some are marked and margined with other colors in exquisite harmony, and all have showy yellow or orange crests or beards, many of the varieties are delightfully fragrant. As cut flowers they are highly prized, cut in the bud state the flowers will open in succession and last for several days with stems in water. For garden and landscape decoration—groups and masses of them are very effective, being perfectly hardy, thriving and increasing year after year in any sunny situation in ordinarily good soil except a wet one which is hable to cause decay. Our collection—herewith catalogued—contains many new and choice varieties, and we are confident they will prove revelations of beauty to Iris lovers. The roots should be divided and replanted every fourth year—early in September is the best time for the plants are then dormant. The roots are ready for shipment from Sept. 1st to Nov. 15.

JAPAN IRIS. (IRIS KAEMPFERI.)

These new Iris are magnificent. The flowers average 8 to 10 inches across, and are charming hues and colors, varying like watered silk in the sunlight, the prevailing colors being white, crimson, rose, lilac, lavender, violet and blue; each flower usually representing several shades while a golden yellow blotch surrounded by a halo of blue or violet at the base of the petals intensifies the coloring.

The Japan Iris is perfectly hardy and flowers in great profusion in June and July, attaining greatest perfection if grown in moist soil, or if plentifully supplied with water while growing and flowering. The earlier the roots are planted after the first of September the better the flowers will be the succeeding summer. (See cut.) Ready September to December.

Spanish Iris. (Iris Hispanica.) This type is well adapted for pot culture and forcing, blooming in the winter. They also do well in bowls of Henderson's Prepared Fibre (see 2d page Cover). The flowers are of great beauty and cut in the bud state last from one to two weeks in bloom. If planted in boxes, pots or pans and placed in cold frames until they show bud, then brought into heat they can be had in bloom from March on, and will give great satisfaction. The Spanish Iris also succeeds nicely as a garden plant, requiring protection in cold latitudes. Mixed Spanish Iris, 15c. per doz.; 75c. per 100; \$5.00 per 1,000. (Weight: 1 lb. per 100.)

Susiana. (The Mourning Iris.) A remark-

Susiana. (The Mourning Iris.) A remarkably handsome species with immense flowers; blush color, tinted with brown and covered with a network of dark veins; May-flowering. Height 1 foot. 20c each, \$2.00 per doz; \$16.00 per 100.

IRIS HOLLANDICA.

JAPAN IRIS NEW Giant Dutch Iris. IRIS HOLLANDICA.

IRIS HOLLANDICA.

This new race was produced by crossing various types of bulbous trises resulting in an early giant flowering type resembling the Sparish Iris but bearing much larger flowers, and coming into bloom about two weeks earlier or in the open garden the latter part of May. The flowers are of splendid substance and the range of colors varied from the rich and showy tones to soft and delicate shades. They require the same cultural conditions as the English and Spanish Irises—slight protection in cold localities—or may be flowered during the winter in pots or pans of soil or Holland Fibre (See 2d page Cover.)

Henderson's Modern HERBACEOUS PEONIES.

A SELECTION FROM THE WORLD'S NEWEST AND BEST VARIETIES.

WITHIN the past few years this magnificent section of hardy herbaceous flowering plants has been brought into very prominent notice because of the general improvement in varieties of comparatively recent crigin. In these newer sorts the flowers have attained immense proportions, reaching in some instances the large size of seven to nine inches in diameter and five to six inches in depth. The range of color is also so varied that almost every tint of pink, white red, crimson and even yellow is comprised in the list. The vigor and habit of the plants have been so improved that stems two and one-half to three feet in length, and sufficiently strong to properly support the immense blooms, are now grown. There is an element of practical, permanent value in the Peony; that is, the plants once purchased and planted in suitable soil, continue to increase in size and profusion of bloom, and pay a generous annual dividend in the way of an enormous crop of magnificent, deliciously fragrant blooms that are unsurpassed for decorating purposes.

OUR DEPARTURE IN OFFERING PEONIES It is the rule among most sellers of Peonies to send out divided roots, that is older plants cut into several 3 to 5 crowned roots. These of course can be sold at a lower price, but all Peony purchasers should know that normal or characteristic flowers of maximum size will not be produced on these divided roots for two or three years. As most of our customers prefer to pay a little more and get older undivided roots therefore we are this year offering roots of 1, 2, and 3 years growth from the divided stage. These according to age, will give a greater quantity of perfect bloom the succeeding summer if planted between September 1 and November 1.

FOR SHIPMENT SEPTEMBER 1st TO NOVEMBER 15th.

Henderson's Miscellaneous Bulbs for Autumn Planting.

NEAPOLITANUM

GIANT HYBRID AMARYLLIS.

"INTERNATIONAL PRIZE" STRAIN.

Awarded the Prize at the International Flower Show, New York.

These giant flowering hybrids of Vittata are unnamed seedlings from a famous English Collection and are of exceptional beauty. The coloring and markings are exquisite; the bulbs are very large, and are of sufficient strength and age to produce magnificent flowers during the winter or spring. They are probably the most magnificent and gorgeous bulbous plants known. Their immense flowers, richness of coloring and regal habit are simply incomparable. They throw up spikes from 2 to 3 feet high, bearing enormous wide petalled flowers averaging 8 to 10 inches across and of great substance, some being of rich and glowing colors, others delicately shaded and superbly veined. (If by Parcel Post add postage at Zone Rates—Single bulbs mailed free.

Mixed varieties, \$1.00 each; \$10.00 per doz. (Weight 4 lbs. per doz.)

Amaryllis Johnsoni. (Bermuda Spice Lily.) A very popular variety, large flowers of bright red, with a white stripe down each petal; an early and abundant bloomer and a robust grower. Large bulbs. 40c. each; \$4.00 per doz. (Weight 6 lbs. per doz.)

Amaryllis Formosissima. (Jacobean Lily.) A quaintly shaped, beautiful flower of grand, dark scarlet, free blooming; forces well and can be grown in water like Hyacinths. 20c. each; \$2.00 doz. (Weight 2 lbs. per doz.)

Amaryllis Belladonna Major. (Belladonna Lily.) Autumn-blooming variety of extreme beauty and fragrance; the spikes grow from 2 to 3 feet high, each carrying from 6 to 12 beautiful flowers, "sweet as lilies," of silvery-white, flushed and tipped with rose. South of Washington these Belladonna Lilies will thrive in open ground if planted 6 inches deep in light, well-drained soil they will then bloom year after year. 20c. each; \$2.00 per doz.; (Weight 6 lbs. per doz.)

Winter Aconite.

(Eranthis Hyemalis)

Early in spring the golden blossoms of the Winter Aconite look charming, resting on an emerald-green cushion of leaves and forming a striking contrast to the Snowdrop, Scillas and Chionodoxa. The foliage remain long after the flowers, making the plant especially valuable in moist situations such as under trees, which the Winter Aconite enjoys and where few other flowering plants will thrive. 3 to 8 inches high. 20c. per doz.; \$1.25 per 100; \$10.00 per 1000. Mailed free.

GROWING BULBS IN HENDERSON'S PREPARED HOLLAND FIBRE.—For winter flowering in the house—in bowls, jardinetts, etc., without drainage—as described on 2d page of Cover is a cleanly, sweet and successful method. Our booklet "How to Grow Bulbs in Henderson's Prepared Holland Fibre" free to customers on request

Aureum. (Moly or Golden Allium.) One of our most showy border plants, perfectly hardy, bearing large umbels of golden yellow flowers in June. An old favorite, and fine for naturalizing in the garden, where it forms large clumps. Height, 1 foot, 15c. per doz.; 75c. per 100; \$5.00 per 1000.

Neapolitanum Grandislorum. This is an important variety for winter flowering in pots of soil or bowls of Henderson's Fibre (see 2d page Cover), and is also extensively forced by florists for cut flowers, as they last well. The blossoms are borne in large umbels and are pure white with green stamens. They may be had in flower from Dec. to April. Height 15 to 18 inches. Large bulbs, 20c. per doz.; \$1.25 per 100; \$10.00 per 1000.

Ostrowskianum. A beautiful new species from Asia Minor, with large heads of beautiful rose-colored flowers, on stalks 2 feet high; very early, free-flowering and hardy 30c. per doz.; \$2.00 per 100

EENDERSON'S BULB CULTURE.

Revised and enlarged edition. 68 pages. Price, postpaid, 50c. or given free with orders of \$2.00 or over.

This newly revised and enlarged edition gives the up-to-date methods of treatment for all kinds of Hardy and Tender, Winter, Spring Summer and Autumn Flowering Bulbs, Tubers, Corms, etc.

ANEMONES.

Highly ornamental winter and spring flowering plants, having both single and double flowers, the colors of which are wonderfully beautiful, running through shades of blues, scarlet, rose, white, lavender, etc. The tubers planted this fall will flower during the winter in pots in the house, or they may be grown on in cold frames for spring blooming or may be planted in the open ground in sheltered locations if well protected. For cutting they are grand.

If by Parcel Post add postage @ Zone Rates. Weight \(\frac{3}{4}\) lbs. per 100. Dozens mailed free.

Double Poppy-Flowered. (Coronaria, fl., pl.) The flowers are very double, and surrounded with large guard petals. Gorgeous colors, two or three colors usually being blended in the flowers. Mixed colors, 30c. doz., \$2.00 per 100.

Single Poppy-Flowered. (Coronaria.) Large beautiful saucer-shaped poppy-like blossoms. Mixed colors, 20c. doz., \$1.50 per 100.

Giant "St. Brigid" Anemones. A new Irish race bearing magnificent flowers, double, semi-double and single, 3 to 5 inches, across and of the richest as well as the daintiest colors, markings, blendings, etc. The flowers are borne freely on long stems and are extravagantly beautiful when vased, the graceful feathery foliage supplying a charming setting. Mixed colors. 35c doz., \$2.50 per 100.

Fulgens. Rich, dazzling scarlet flowers. 40c. doz., \$3.00 per 100.

HARDY ANEMONES

These are beautiful subjects for permanent situations or naturalized in quantity in the grass or wild garden or the hardy border where they soon form large colonies of great beauty; a situation partially shaded suits them to perfection.

Apennina. Beautiful rich blue flowers, as large as a fifty cent piece; elegantly cut foliage; it blooms profusely in early spring; fine in garden borders and naturalized; also beautiful grown in pots. ½ foot, 35c. doz.; \$2.50 per 100.

Blanda. The earliest, largest-flowered of the spring-blooming Anemones, blooming with snowdrop and Crocus; colors range from pure white to deep blue. Flowers are 1½ in. across. It is a lovely variety, as hardy as a rock. It spreads itself in large clumps, grows freely; fine for naturalizing and forces easily in pots for winter flowers. 75c. doz.; \$5.00 per 100.

------ ARUM.=

If by Parcel Post add postage at Zone Rates. Weight 3 lbs. per doz. Single bulbs mailed free.

Dracunculus. (Dragon Arum.) Flowers 1 foot long, purple, red and black blue; stem beautifully marbled; leaves, handsome, resembling a small palm; a rapid

leaves, handsome, resembling a small palm; a rapid grower, making a curious and ornamental pot plant. 15c. each; \$1.50 dez; \$10.00 per 100.

"BLEEDING HEART" or DIELYTRA.

One of the most ornamental of hardy spring-flowering plants, with elegant green foliage and long drooping racemes of heart-shaped pink and white flowers. This is deemed one of the finest of all hardy garden plants. If potted in November, left outside till it has formed new roots and then brought into a gentle heat, it may be had in flower in the greenhouse in February and March. (Ready in November.)

Dielytra Spectabilis. Large roots. 20c. each, \$2.00 per doz. If by Parcel Post add Postage @ Zone rates. Weight 3 lbs. per doz.

BULBOCODIUM VERNUM.

Spring Colchicum or Meadow Saffron.

A charming early spring-blooming plant in flower two weeks before the Crocus producing masses of rose-purple flowers, very beautiful for edgings and patches here and there. Clumps of them dug up and potted in the winter and placed in a sunny window will soon be a mass of bloom. 40c. doz.; \$3.00 per 100. If by Parcel Post add postage at Zone Rates. Weight 2 lbs. per 100.

CALLAS

If by Parcel Post add postage @ Zone Rates. Weight 2 lbs. per doz. Single Bulbs mailed free.

Calla Aethiopica, or Lily of the Nile. This old favorite White Calla Lily is too well known to require any description. We offer dry roots, as they are superior for forcing and winter-flowering purposes; they come into bloom quickly and require less room making less foliage. Extra large bulbs, 30c. each, \$3.00 per doz.

The Godfrey Everblooming Calla. This new hybrid is a true ever-blooming variety. A good plant produces an astonishing quantity of large, snow-white, slightly fragrant flowers. Compared with the ordinary white Calla, it gives three flowers to one, the flower being equally large, of perfect form and very much whiter. Properly treated, the same plant will grow and bloom without ceasing. The plant is of dwarf, compact, strong growth, about 18 inches high, with an abundance of dark green leaves. Dormant bulbs, 30c. each, \$3.00 per doz.

Little Gem Calla. This little pigmy rarely exceeds 12 inches in height and blooms most abundantly. The flowers are not more than half the size of the common variety, and therefore can be used with telling effect in bouquets. A fine house plant. Dry bulbs, 15c. each; \$1.50 per doz.

Pink Calla. (Richardia Rehmanni.) A dwarf growing bulbous Calla producing freely erect trumpet-shaped flowers of pink tinged with purplish-rose inside; foliage green. Suitable for either pot culture during winter or for gardens in summer. Dry bulbs 50c. each, \$5.00 per doz.

Yellow Caila, Elliotianna. The finest yellow Calla; large, rich deep golden flowers often 4 to 5 inches across at the mouth; habit of growth and foliage like the old favorite white Calla excepting the leaves of Elliotiana are spotted with white. Dry bulbs, 50c. each, \$5.00 per doz.

Spotted Leaf Calla. (Richardia Alba Maculaia.) Dark green leaves spotted with white; in other respects the plant is similar to the old favorite white Calla, excepting being of smaller habit. Large bulbs, 15c. each, \$1.50 per. doz.

CHIONODOXA. GLORY OF THE SNOW.

If by Parcel Post add postage at Zone Rates. Weight 1 lb. per 100. Dozens mailed free.

These are among the most exquisite of spring-flowering blubs, and should be grown in quantities. They produce flower spikes bearing 10 to 15 lovely scilla-like flowers. They are perfectly hardy, and may be planted as an edging to a bed, or in masses; naturalized in the lawn they are charming; they flower with the Snowdrops and last a long time in perfection. They will thrive well in any good garden soil, and are admirable for pot culture for winter blooming in the house and for forcing, for cut flowers.

Chionodoxas also do especially well grown in Henderson's Prepared Fibre. (See 2d page cover.) Remember that our Chionodoxa bulbs are large cultivated bulbs that will throw up several spikes bearing several flowers on each and not the collected "seconds" that can be sold at a lower price.

Chionodoxa Gigantea. Unusually large flowers of lovely lilac-blue, with conspicuous white center (large cultivated bulbs). 25 c. per doz., \$1.75 per 100, \$15.00 per 1000.

Chionodoxa Luciliae. Bright blue with large clear white center (large cultivated bulbs). 25c. doz., \$1.50 per 100, \$12.00 per 1000.

Chionodoxa Sardensis. Intense deep blue (large cultivated bulbs). 25c. doz., \$1.50 per 100, \$12.00 per

CHIONODOXA OR "GLORY OF THE SNOW."

CAMASSIA or INDIAN QUAMASH.

If by Parcel Post add postage at Zone Rates. Weight 1 lb. per 100. Dozens mailed free.

Esculenta. Perfectly hardy, thriving in sheltered and partially shaded situations; the stout flower stems grow from 2 to 3 feet high, and bear 20 or more large blue flowers, each 2 inches across; a large clump in bloom is very effective. 20c. doz.; \$1.25 per 100; \$10.00 per 1000.

CROWN IMPERIALS.

Well-known spring-blooming, stately, hardy border plants, with clusters of immense pendant, bell-shaped flowers, surmounted with a tuft of green leaves. They are very effective, and if left undisturbed for years they form gigantic and picturesque groups, bearing gorgeously colored flowers. If by Parcel Post add Postage at Zone Rates. Weight 3 lbs. per doz. Single bulbs mailed free.

Mixed Colors. 15c. each, \$1.50 per doz., \$12.00 per 100.

GIANT PERSIAN CYCLAMEN.

These are among our most beautiful and interesting winter and spring-flowering bulbs for the window and greenhouse. Not only are the flowers of striking beauty but the foliage is also highly ornamental, consequently they are very decorative even when not in bloom. There are no plants better adapted for pot culture, and few that produce such a profusion of bloom; the flowers range through many shades of pink, crimson, white, etc., some being beautifully spotted, Most of them are, moreover, delicately fragrant. Our bulbs are from the most famous Cylcamen grower in Europe and will produce flowers of rare merit. The flowers of this magnificent giant strain are of extraordinary size for Cyclamen, and of great substance. The leaves are proportionately large and beautifully marked. We offer the following separate colors, viz.:

Rose Color, White or Crimson, 25c. each, \$2.50 per doz. New Salmon, Colored, beautiful. 30c. each, \$3.00 per doz. Mixed Colors, Giant Persian Cyclamen, 20c. each, \$2.00 per doz. Mailed free.

NEW GIANT BUTTERFLY CYCLAMEN.

This new type (C. Rococo) produces very large flowers with fringed and fluted edges being further distinguished by coloring differing from that of the body of the flower as, white with red or purple edge, rose with scarlet edge, crimson with garnet or violet edge, etc. The color of the eye or base of the flower usually corresponds with the marginal color. Mixed Colors, 35c. each, \$3.50 per doz.

ERYTHRONIUM. (DOG'S TOOTH VIOLETS.)

Beautiful plants, perfectly hardy, the foliage is usually charmingly variegated, and a mass of 15 or 20 plants is a pretty sight even when not in flower, but when the graceful flowers are in bloom the effect is matchless. The plants luxuriate in rather moist, partially shady positions. Mixed Colors. New large flowered hybrids, including purples, rose, white, etc., 25c. per doz.; \$1.50 per 100; \$12.00 per 1000. Mailed free.

HENDERSON'S SUPERIOR FREESIAS.

If by Parcel Post add postage at Zone Rates. Weight 1 lb. per 100; dozens mailed free.

Freesias are most popular and charming bulbs for pot culture, flowering in the winter and spring in the conservatory, or window garden; 6 or 8 bulbs should be planted in a 4-inch pot. They force readily and can be had in bloom by Christmas if desired, and by having a dozen or more pots started in the cold frame they can be brought in at intervals, thereby keeping up a continuous display of bloom through the winter; the flowers are produced 6 to 8 on stems about 9 inches high, and are particularly useful for cutting, remaining in good condition kept in water for two weeks. (See cut.)

Refracta Alba. The flowers are pure white with a yellow blotched throat and are exquisitely fragrant. Extra Size Bulbs, 35c. per doz.; \$2.25 per 100; \$20.00 per 1000.

Furity. A distinct and greatly inproved type producing large sprays of purest snow white flowers of immense size and deliciously fragrant; it is very free blooming and of great value for forcing for cut flowers. Extra Size Bulbs, 40c. per doz.; \$2.75 per 100; \$25.00 per 1000.

NEW COLORED FREESIAS.

These beautiful novelties are rapidly winning favor on account of their lovely and unique colorings and shadings, their delicate fragrance and their free blooming qualities. Each principal spike usually carries 7 to 9 flowers—while the side spikes of which each bulb produces several usually bear 5 to 6 flowers. Their culture differs in no way from that of Freesia Refracta.

If by Parcel Post add postage at Zone Rates. Weight 1 lb. per 100. Dozens mailed free.	Each	Doz.	100
Amethyst. Soft lavender mauve. Chapmani. Rich orange yellow. Leichtini Major. Light primrose with orange blotch. Rosa Bonheur. Soft rose with yellow. Bluebeard. Rich violet-blue. Tubergiana. Carmine-rose. Mixed Hybrids. Including many beautiful new colors and shades.	.20	2.00	15.00

EARLY-FLOWERING GLADIOLUS.

These Gladiolus are invaluable for flowering in the greenhouse for winter bloom. The flowers are smaller and more refined than those of the Gandavensis Gladiolus; in colors and markings are very handsome the bulbs can be kept dormant until spring and then planted be in open ground if preferred, blooming in June and July. If planted in cold frames they will flower as early as May, and this is perhaps the better way in very cold localities. (Ready in November.)

FREESIA SNOWSTORM.

BANDARAN DI SAKRI TANCIN DI KANDAN PERAKUNAN DI JUNTAK DI MIRIKAN 💼

IXIOLIRION TARTARICUM.

An elegant half-hardy bulbous plant of free growth producing grand spikes, 2 feet high of bell-shaped star-like flowers of rich purple shaded sky blue.

It blooms naturally in summer, and the bulbs can be kept dry and planted out in spring, or they may be grown in pots in cold frames, and be brought in the conservatory towards spring for blooming. 35c. per doz., \$2.50 per 100.

LILY OF THE VALLEY.

The Lily of the Valley is one of the most admired and useful plants grown; the modest bell-shaped flower of purest white on long stems are highly prized for cutting purposes; for flowering in pots in the winter they are exceedingly well adapted and will last several weeks in beauty. By taking them in at intervals a succession of flowers may be kept up all winter. They are also forced in immense quantities, but they are the most charming when grown in large patches, in partially shaded localities around the lawn near the borders of streams, lakes, etc., being perfectly hardy. (Ready for delivery in November')

Henderson's Extra Danish (Single Crowns or "Pips") The finest grade of Crowns in the work for winter flowering. They will bear 12 to 16 large bells on strong stalks, with foliage, even when forced for extra early; the pips average large, plump and regular, with extra long roots. 25 Crowns (1 bundle) \$1.00; 100 Crowns, \$3.00; \$26.00 per 1000. If by Parcel Post add postage at Zone Rates. Weight 5 lbs. per 100.

Fortin's Giant. This is the largest variety yet produced; it is only adapted for open ground planting and may not show much superiority the first spring after planting, but by the second season, or when it gets well established, it produces wonderfully luxuriant foliage and immense spikes of purest white bells twice the size of any other sort. In every way it is superior. Crowns, 50c. per doz.; \$3.50 per 100; \$30.00 per 1000. If by Parcel Post add postage at Zone Rates. Weight 5 lbs. per 100. Dozens mailed free.

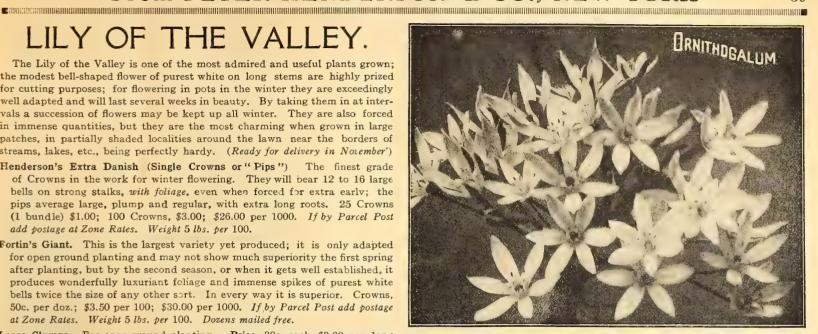

Large Clumps. For open-ground planting. Price, 30c. each; \$3.00 per doz.; \$22.00 per 100. If by Parcel Post add postage at Zone Rates Weght 2 lbs. each.

LACHENALIA NELSONI.

Beautiful early spring flowering bulbs for the green-

house or window garden. Of the easiest culture;

treated as Hyacinths and grown cool they will

ORNITHOGALUM ARABICUM.

STAR OF BETHLEHEM.

A beautiful variety, throwing up a tall spike bearing numerous large, milk-white, star-shaped flowers, with a black centre, and having a distinct aromatic perfume. They are decidedly pretty and interesting when grown in the garden—but are more largely grown

for greenhouses and window decoration, being of the easiest culture. Largely forced by florists now for cut flowers. 40c. doz.; \$2.50 per 100. If by Parcel Post add postage at Zone Rates. Weight 11 lbs. per doz.; 10 lbs. per 100.

Charming little half-trailing or bushy plants particularly adapted for pot culture and hanging baskets, the foliage alone is very attractive and when in flower they are exceedingly pretty.

Bermuda Buttercup. This is one of the finest winter-flowering plants for pot culture; it is a strong luxuriant grower, and the great profusion of bloom produced in uninterrupted abundance for weeks is astonishing. The flowers are of the purest bright buttercup yellow. 5c. each, 50c. per doz., \$2.50 per 100. Mailed free.

BERMUDA BUTTERCUP Grand Duchess California varieties of great beauty; of dwarf, sturdy growth, throwing large, exquisite flowers well above the foliage. Extremely free-flowering, from November to June. Price for either White, Pink or Lavender, 5c. ea., 50c. dcz., \$2.50 per 100.

Boweii. Vivid rosy-crimson, large flower. 5. each, 50c. per doz., \$2.50 per 100. Mailed free.

Alba. White, 5c. each, 50c. per doz., \$2.50 per 100. Mailed free. Mixed Colors. 25c. per doz., \$1.50 per 100. Mailed gree.

PUSCHKINIA. SCILLIOIDES.

OXALIS

A hardy bulbous plant of great beauty, flowers white striped with pale blue, on spikes. It succeeds well in pots for winter blooming, and is admirably adapted for edgings and forming patches in front or mixed borders, flowering in April and May. Height, 4 to 8 in. 25.c. doz., \$1.25 per 100, \$10.00 per 1000. If by Parcel Post add postage at Zone Rales. Weight, 1 lb. per 100. Dozens mailed free.

RANUNCULUS.

Among dwarf flowers these are unrivaled for form and Among dwarf flowers these are univaled for form and attractive colors, ranging through shades of crimson, white, yellow, purple, black, many of them being beautifully marked with other shades. They flower profusely in pots in the house during the winter or if grown in frames in the spring. Mailed free.

Double Turban, Mixed Colors. Peony-formed flowers, large and early, vivid colors and compactly double 25c. doz., \$1.50 per 100.

Double Giant French Mixed. Remarkably vigorous growers with immense and gorgeous. loosely double flowers. 25c. doz, \$1.25 per 100.

Double Persian Mixed. Camellia or rose-shaped flowers,

very double, rich variety of colors. 25c. doz., \$1.25 per 100.

(Guernsey Lily.) These Lilies are probably the most popular and useful of the Amaryllis family. For autumn and winter flowering they are extremely beautiful, throwing up stems from 18 to 24 in., surmounted with lily-like flowers, of rich salmon-red, about 2 in. across.

25c. each; \$2.50 per doz. (Mailed free.)

Read about Henderson's Prepared Holland Fibre on 2d page cover.

RANUNCULUS.

HIGH GRADE BULBS FOR AUTUMN PLANTING

SCILLAS. WOOD HYACINTHS AND BLUE BELLS.

If by Parcel Post add postage at Zone Rates. Weight of Siberica varieties 1 lb. per 100. Weight of Campanulata varieties 5 lbs. per 100. Dozens mailed free.

Siberica. (Amoena or Praecox.) Hardy spring bulbs producing exquisite blue flowers almost before the snow has disappeared. If grown in masses their flowers fairly carpet the ground. They should be largely planted as undergrowth in Hyacinth beds, etc. Grown in pots or in Henderson's Fibre (see 2d page Cover), they may be had in bloom from Christmas until April. Large cultivated bulbs, 20c. doz.; \$1.25 per 100; \$10.00 per 1000.

Siberica Alba. The new white flowering variety, very beautiful. 25c. doz.; \$1.50 per 100; \$12.00 per 1000.

Bifolia. Most beautiful bright blue flowers borne on short spikes; these should be extensively planted they are also fine for forcing. 20c. doz.; \$1.50 per 100; \$10.00 per 1000.

Campanulata. (Wood Hyacinth.) Flowers borne on tall spikes, 1 to 2 feet high. Each flower measures nearly one inch across; perfectly hardy and fine for pot culture or grown in fibre (see 2d page cover)

Campanulata Major, Blue. 20c. doz.; \$1.00 per 100; \$9.00 per 1000.

Campanulata, White. 20c. doz.; \$1.00 per 100; \$9.00 per 1000.

SNOWDROPS. In the early spring there is nothing more beautiful than a sheet of the snowy, graceful blossoms of the Snowdrop. In beds of Tulips and Hyacinths, Snow-

drops are very effective between the lines; they flower while these bulbs are just moving the surface, and when

the flowers are over there remains an elegant groundwork

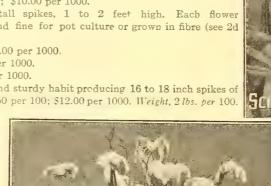

of green foliage. Snowdrops are easily flowered in pots during the winter or in bowls or dishes in Henderson's

> SEDWA M FIERE

Campanulata Rose. 20c. doz.; \$1.25 per 100; \$10.00 per 1000.

■JOHERRIO, TREARIARENDERIKRIK MERIK MIKUK METURIKAN BURUKAN B

Excelsior. A new variety of unusually strong growth and sturdy habit producing 16 to 18 inch spikes of very large flowers; lavender shaded blue. 25c. doz.; \$1.50 per 100; \$12.00 per 1000. Weight, 2 lbs. per 100.

The Snowflakes are hardy bulbous plants closely related to the Snowdrops—but are of more robust growth, producing larger flowers on taller stems. Snowflakes deserve to be on taller stems. Snowflakes deserve to be better known and more extensively planted particularly in masses in semi-shaded places in the garden border, naturalized in grass, etc. Plant the bulbs about 3 inches apart etc. Plant the bulbs about 3 inches apart and 3 inches deep. If by Parcel Post add postage at Zone Rates, weight 1 lb. per 100,

dozens mailed free. Spring Snowflake (L. Vernum). One of our

earliest spring blooming bulbs, flowers in terminal drooping clusters. Color, white, a small green tip adorning the tip of each petal; height 6 in. 30c. doz.; \$1.75 per 100; \$15.00 per 1000.

Carpathian Snowflake (L. Vernum Carpathicum) A very robust growing variety of spring Snowflake with clusters of larger

flowers on taller stems; white tipped yellow; height 1 foot. 30c. doz.; \$2.00 per 100; \$18.00 per 1000.

Summer Snowflake (L. aestivum). Produces tall spikes of large elegantly drooping white flowers in May; splendid for cutting, height 18 in. 30c. doz.; \$2.00 per 100; \$16.00 per 1000.

SPIRÆA or ASTILBE.

In garden culture these flower freely during the summer and are perfectly hardy, but their great value is when grown in pots for window and greenhouse decoration in winter and spring and for forcing for cutting. The flowers are borne in large feathery panicles and last a long time in bloom. (Ready for shipment in November.)

If Spiraeas are desired by Parcel Post at postage at the zone rate. Weight 11 lbs. each, 15 lbs. per doz.

Gladstone. An improvement over all other white-flowering Spiraeasthe immense trusses of flowers are as white as snow, borne on erect, strong stalks, 18 in. high. Well-grown plants bear 25 to 40 of these plume-like trusses. Price of strong roots, 20c. each, \$2.00 per doz., \$12.00 per 100.

"Peach Blossom." This beautiful rosy pink variety is of the same dwarf compact habit as "Gladstone." It forces equally well under the same cultural conditions, only it comes into bloom a few days later. If slightly shaded when coming into bloom the color will be brought out to perfection. Price, 20c. each, \$2.00 per doz., \$15.00 per 100.

SPARAXIS. Beautiful flowers about 2 inches across, borne onlong spikes; the spotted, streaked and flushed in the most pleasing manner. The bulbs are not hardy, but do exceptionally well when grown in the house in pots or in cold frames. They flower during the winter and spring. Sparaxis, mixed colors, 20c. per doz., \$1.00 per 100. Mailed free.

WATSONIA. Ardense Alba. This new white variety has become a very popular plant, for it has unusual merit. The bulbs send up branching stems, 3 to 4 ft; high, each bearing a dozen or more flowers 2 in. across. Exceptionally beautiful as a cut flower. It may be grown as a winter cut flower or the bulb may be planted in the spring in the garden, like a gladioli, flowering from July to September. Strong bulbs, 15c. each, \$1.50 per doz., \$10.00 per 100. If by Parcel Post add postage at Zone Rates. Weight 1½ lbs. per doz., 10 lbs. per 100. Single bulbs mailed free.

HARLEQUIN

About Forwarding Plants.

Unless otherwise ordered we send all plants by express (buyer to pay charges). Hardy shrubs, vines and hardy roses may be sent safely by freight, but unless the be sent safely by freight, but unless the shipment is a large one express is cheaper, quicker and safer. Small lots of Geraniums, Fuchsias, Small Palms, Begonias, Ferns, Violets, Perennials, Heliotropes and Primulas may be sent free by mail, if desired. The new rates of the express companies are much lower than heretofore. When plants are sent by express a receipt is obtained thus carrying insurance. All the soil may be left on the plants so we recommend shipping plants by express, and we guarantee a safe arrival in the U.S. If in good condition when received our responsibility ceases, and if from inattention or other causes they fail, and complaint is then made, we cannot replace them. Plants sent other than by express are entirely at the risk of the purchaser.

BEGONIAS. Flowering Sorts.

Alba Picta. Dark green leaves, silvery spots. White flowers.

Argentea Guttata. Bronzy-green leaves. White flowers.

Bertha de C. Rocher. Bright reddish-pink flowers in drooping panicles.

Metallica. Velvety-foliage, metallic or bronze color, veined darker; rosy white flowers.

Nitida. Pinkish-white flowers large "elephant ear" leaves.

Otto Hacker. Bright red, large pendant clusters; a tall vigorous grower.

Purity. Dwarf, compact habit, waxy-white flowers, both summer and winter.

Rubra (Corallina). Flowers dark coral color in large clusters. Glossy green leaves.

Saundersonii. Bright waxy-red. Very free flowering. Makes a very graceful pot plant.

Thurstonii. A grand variety in every way. flowers rosy-white, foliage bronzy-green, reverse purplish-red.

Vernon. Brilliant crimson-scarlet flowers, dark green glossy foliage.

Zulu King. The foliage turns blood red outdoors. Flowers deep crimson red.

Price, from 3-inch pots, 10c. each; set of 12 Begonias for \$1.00.

CAMELLIA JAPONICA.

We offer fine bushy plants well branched and budded. They are about 2 ft. high, double white, double pink, double red and double variegated. Not mailable. Price, \$1.00 each; set of 4 for \$3.00

CHRYSANTHEMUMS.

We have a fine stock of plants in 5 inch pots, well-known sorts suitable for immediate effect. They will be in bloom about November 1, nice bushy plants. By express only. Price, 30c. each; set of 12 distinct sorts for \$3.00.

Special Notice. - Want of space in this catalogue will not permit us to list our full collection of chrysanthemums. We have in stock, however, mostly all the varieties offered in our spring catalogue of "Everything for the Garden," and can supply them at the prices quoted therein.

COREOPSIS.

Lanceolata grandflora. One of the most popular hardy plants. The flowers are a rich goldenyellow, of graceful form and invaluable for cutting; the main crop comes during the latter part of June, but it continues in bloom the entire summer and autumn; it succeeds everywhere.

Rosea. Finely divided, dark green foliage, bearing in August and September numerous small pink flowers; useful in border or rockery; 1 foot.

Price, 15c. each; \$1.50 per doz.; \$10.00 per 100. For other hardy Perennial Plants see page 44.

Note.—The Carnations offered have been specially grown for winter flowering. They are strong, healthy plants, well branched and set with flowers and buds. The plants from the open ground are not potted, but if put in pots when received should flower freely. We also offer strong plants extablished in pate ready Oct. 1st. ceived should flower freely. We established in pots ready Oct. 1st.

STANDARD NAMED CARNATIONS.

BEACON. Brilliant scarlet with crimson tones; a free flowering sort grown for ! cut flowers. (See engraving.)

Enchantress. A superb shade of rosy-blush pink, very rich toward the center; extra fine, unrivaled in its color.

Harlequin. Bright orange splashed with red, a very unique sort and quite attractive. (See engraving.)

J. H. Manley. Brilliant orange-scarlet, blooms average 3 to 3½ inches in diameter. very fragrant.

Matchless. The flowers are large, fringed and very fragrant. They are borne on long stiff stems. Color pure white.

Mrs. C. W. Ward. Perfect form, full center, color deep lustrous pink. A magnificent variety of the largest size, free blooming and keeps splendidly. Rosette. A beautiful shade of rose pink. Very large flowers and admirable grower.

Salmon Beauty. A beautiful shade of pink somewhat deeper than Enchantress.
The calyx is long and narrow and does not split.
White Enchantress. A pure white "sport" from the pink Enchantress offered above, large beautiful flowers. (See engraving.)

Price, plants open ground, not potted, ready Sept. 1st, 20c. each, \$2.00 per doz., \$12.00 per 100. Plants established in 5 in pots (ready Oct. 1st) 30c. each, \$3.00 per doz., \$20.00 per 100.

HARDY FERNS. Ready Oct. 20th.

The tendency towards natural gardening has brought many plants into prominence which had long been neglected; none are more deserving of this distinction than Hardy Ferns. Given a porous soil rich in humus, a shady or partially shaded position and they have interested to the property of the property o moisture, and they luxuriate, coming up year after year. We offer a choice selection of the best native sorts. Price, 20c. each, \$2.00 per doz., \$15.00 per 100. Set of 10 distinct sorts for \$1.50.

SPECIAL COLLECTIONS of HARDY FERNS.

The use of Hardy Ferns in ornamental planting is increasing wonderfully. Our native varieties are so beautiful and diversified in character that it is somewhat strange their use has not previously been more general. They adorn the humblest surroundings as they grace the most pretentious and elaborate gardens. We are constantly being asked for suitable varieties for shade, damp spots, open places, rockeries, etc., etc. The following collections of Ferns are made up for planting in the special locations named. Ready Oct. 20th Oct. 201h.

Coll. A.—For Open Sun Culture. 42 plants in 4 varieties. This collection is desirable for the open border, and, all being rather tall, can be grown as single specimens or for massing with or without flowers.

Coll. B.—For Dry, Shady Places. 48 plants in 4 varieties. These ferns will grow in a dry, shady place. Plant them where flowers as a rule do not thrive.

Coll. C .- For Moist Shady Places. 54 plants in 9 varieties. This collection is very fine and easily handled in moist, shady places, also for large rockery

Coll. D .- For Wet, Open Ground. 48 plants in 4 varieties. These ferns are very useful for border of a lake or low, wet ground.

Coll. E .- Low Evergreen Ferns for Rockery in Shade. 54 plants in 5 varieties. This is a beautiful collection of low-growing Ferns and easily managed.

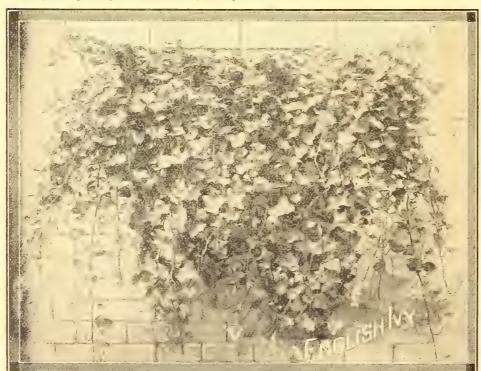

Coll. F.—Low Evergreen Ferns for Dry, Rocky Ledge. 48 plants in 4 varieties. This is a very useful collection for planting where it is difficult to get anything else to grow.

Price for any of the above collections \$5.00 each. One-half of any one col-lection for \$3.00. These cannot be mailed. Not less than half collection

ENGLISH IVY FOR WINDOW BOXES.

The English Ivy is used extensively for window boxes and vases during the summer, its value for outdoor window boxes in winter is recognized widely, as the display at the large hotels and fine private residences shows. It is also a good climbing plant for the house. (See cut.)

Price, field grown plants, 25c. each; \$2.50 per doz.

KODADDI DIKUDIKADI KALIKADI KEPUTADI KALIKADI KALIMADI KALIMBADI KADI KADI KALIMBADI K

BOSTON FERN.

Nephrolepis Bostoniensis. In well-grown specimens the fronds attain a length of six or seven feet, like plumes, arching over in every direction, in a most gracemanner.

arasianian aniantaniasiasiasiasiasiasian marasiasia

Price, plants from 2-inch pots, 10c. each. \$1.00 per doz.; 3-inch pots, 20c. each, \$2.00 per doz.; 4-inch pots, 30c. each, \$3.00 per doz.; 5-inch pots, 50c. each, \$4.50 per doz.; 6-inch pots, 75c. each; 7-inch pots, \$1.25 each; 8-inch pots, \$2.00 each

New Ostrich Plume Fern.

Nephrolepis Whitmani. A new form of the "Ostrich Plume" Fern. The pinnae subdividing making miniature fronds; which are superimposed on the main fronds, looking as if two or even three were condensed in one. They are graceful beyond description, feathery, plumy; nothing describes them better than Ostrich Plumes. This is the best of the type. Price, from 2-inch pots, 10c. each, \$1.00 per doz.; 3-inch pots, 20c. each, \$2.00 per doz.; 4-inch pots, 35c. each; 5-inch pots, 50c. each; 6-inch pots, 75c. each, 7-inch pots, \$1.25 each.

THE NEW PARLOR FERN.

Nephrolepis Scotti. This is a condensed form of the Boston Fern, with valuable characteristics added, which are not evi-dent in the parent. It has a crispness which is one of its vary valuable characteristics.

Price, plants from 2-inch pots, 10c. each, \$1.00 per doz.; 3-inch pots, 20c. each, \$2.00 per doz.; 4-inch pots, 40c. each, \$4.00 per doz.; 5-inch pots, 60c. each; 6-inch pots, \$1.00 each.

HOUSE FERNS.

We offer an interesting collection, twelve distinct sorts, suitable for house culture. They are splendidly adapted for small ferneries for table decoration also for growing in pots as single specimens.

Price, 2-inch pots, 10c. each, \$1.00 per doz.; 3-inch pots, 15c. each, \$1.50 per doz.

ORNAMENTAL ASPARAGUS.

Greenhouse climbing or drooping plants of rare beauty.

They are specially suited for window gardening.

Sprengeri. A most desirable species; exceedingly useful as a pot plant or to droop from baskets; the fronds are frequently 4 feet long, a rich shade of green. Price, 3-inch pots. 15c. each, \$1.50 per doz.

Plumosus Nanus. (Climbing Lace Fern.) Bright green leaves, gracefully arched, and as finely woven as silken mesh, retaining their freshness for weeks when cut. Price, 3-inch pots, 15c. each; \$1.50 doz.

PAMPHLET ON CULTURE OF AND DESCRIPTIVE LIST OF HARDY FERNS FREE ON APPLICATION.

NEW HARDY PHLOX.

Gefion. A new color in Phloxes a tender peach-blossom pink with bright rose eye, flower and truss very large, on erect, sturdy but compact stems.

Ingeborg. The most brilliant Phlox yet introduced. Color a rich vermillion red with a lively suffusion of orange salmon intensified by a small purplish crimson eye. The flowers, borne in well filled trusses, are large and of superior substance. The plant is a strong healthy grower of medium height.

Rheinlander. A most beautiful salmon pink with flowers and trusses of immense size. The color of the flower is intensified by a very decided deep claret red eye.

Thor. A lively shade of deep salmon pink, suffused and overlaid with a scarlet glow. A light, almost white halo surrounds the aniline red eve.

Wanadis. Entirely distinct, a mottling of white and light violet. The color is intensified by a bright reddish purple eye. A strong grower producing trusses of immense size.

W. C. EGAN. Delicate lilac, illuminated by a large bright solferino eye. In habit of growth it is strong and vigorous producing immense panicles of flowers. (See engraving.)

Price, plants from open ground, ready Oct. 20th, 30c. each. \$3.00 per doz.; set of 6 for \$1.50.

SELECT HARDY PHLOXES.

Antonin Mercie. (Medium.) Light ground color, upper half of petal deeply suffused bluish lilac, large white halo in center.

B. Comte. (Medium.) Intensely rich purplish-crimson.

Champs Elysee. (Dwarf.) A very bright rosy-magenta.

Danton. (Medium.) Large panicles; bright scarlet with purple

red eye.
Eclaireur. (Tall.) Brilliant rosy-magenta with large lighter halo.

Eclaireur, (Tall.) Brilliant rosy-magenta with large lighter halo.

Elizabeth Campbell. (Medium.) Very bright salmon-pink, with lighter shadings, dark crimson eye, a new shade.

Europa. (Medium.) White, with a crimson-carmine eye. Very large trusses. General von Heutz. (Medium.) Scarlet, rose shadings, crimson-red eye. A very beautiful and attractive sort.

Henry Murger. (Tall.) White, crimson-carmine centre.

Jeanne d'Arc. (Tall.) Clear white. A splendid variety.

La Vogue. (Medium.) Beautiful soft, light pink. Large flowers.

Louise Abbema. (Dwarf.) A dwarf variety. Very large flower. Pure white.

Mme. Paul Dutrie. (Tall.) A delicate lilac-rose. The flowers are very large and borne in panicles of immense size.

Mrs. Jenkins. (Tall.) A grand early variety; pure white.

Obergartner Wittig. (Medium.) Bright magenta, with crimson-carmine eye; large flower and truss.

Pantheon. (Tall.) Bright carmine-rose, fine for massing.

Prof Virchow. (Medium.) Bright carmine, overlaid with orange-scarlet.

R. P. Struthers. (Tall.) Rosy carmine with claret-red eye.

Rosenberg. (Medium.) Bright reddish-violet, with blood-red eye, large truss.

Rynstrom. (Tall.) A fine variety for massing. Flowers large and very effective. Bright rose shaded carmine.

Siebold. (Tall.) Bright vermilion-red, overlaid with orange scarlet, crimson-red eye. A very showy variety.

red eye. A very showy variety.

Sunshine. (Dwarf.) Aniline-red, crimson-red eye, light halo.

Von Lassburg. (Medium.) A grand white variety, color very pure and flowers exceptionally large.

Widar. Light, reddish violet, with large white center.

Price, plants from open ground, ready Oct. 20th, 15c. each, \$1.50 per doz., \$10.00 per 100; set of 24 for \$3.00.

HENDERSON'S SUPERB PANSIES.

We have devoted particular care and attention to these for a number of years and have received hundreds of letters praising their superb beauty. This season our mixture is made up from the very best selection of our own saving, also our far-famed "Mammoth Butterfly" strain, so we are convinced our customers will be really delighted with them. Price, plants from seed beds, 30c. per doz., \$2.00 per 100. (Cannot be supplied after Nov. 1st.)

PRIMULAS.

PRIMULA MALACOIDES. A new species from China. It is fairly loaded down with flowers of a very pretty shade of light lilac. They are borne in clusters on long, slender but wiry stems, the individual flowers are one-half to three-fourths inch across. The foliage is very attractive, making a handsome setting for the flowers. As a pot plant or for cut flowers it is of the greatest value. Price, strong plants 15c. each; \$1.50 per doz.

PRIMULA MALACOIDES ALBA. Similar in habit of growth to the above. The flowers are pure white. It possesses the same free blooming qualities and makes a fine pot plant.

PRIMULA OBCONICA. (Large fringed hybrids.) These are great improvements; large fringed-edge flowers nearly double the size of the older type and containing several colors, including lavender, blush-pink, white, etc. Price, strong plants, 25c. each, \$2.50 per doz.

CHINESE PRIMROSES.

For winter flowers there is For winter flowers there is no more desirable plant than the Chinese Primrose. They are easily grown and flower incessantly throughout the winter. We offer crimson, pink, white and rose. Price, 15c each., \$1.50 per doz.

Poinsettia Pulcherima.

SMILAX.

The popular Christmas plant. It bears terminal bracts of fiery scarlet leaves giving the plant a most splendid apthe plant a most spiendid appearance and peculiarly fitting it for decoration at the Christmas holidays. (See engraving.) Price, 1st size, 50c. each, \$4.50 per doz.; 2d size 30c. each, \$3.00 per doz.

VIOLETS.

MARIE LOUISE. This is the variety which is grown by the hundreds of thousands to supply the cut-flower markets of the country. It is not hardy in the North. Color, a rich purple, flowers fragrant, large and double stems long. Price, plants especially prepared for winter blooming, 15c. each, \$1.50 per doz., \$10.00 per 100.

PRINCESS OF WALES. A grand variety; very large single flowers and long stems. Color a deep purple, intensely fragrant. This is a fine variety for cut flowers. Price, plants from cold frames, 15c. each, \$1.50 per doz., \$10.00 per 100.

PLANTS FOR AUTUMN PLANTING

HARDY PERENNIAL PLANTS

This class of plants is fast attaining popularity, and to meet the growing demand we offer this choice selection of sorts, which contains only such as exhibit the greatest contrast of color with profusion of bloom. They flower at different periods and vary in natural height. Other hardy plants, Chrysanthemums, Ferns, Iris, Lily of the Valley, Paeonies, Phloxes, Pinks, Violets, etc., are in this catalogue, see index. NOTE.—Those marked * are suitable for shady places. We have prepared a Planting Map of a Hardy Border as a guide to the planting of the Hardy Perennials on this page which we will send free if asked for.

HARDY CLIMBING PLANTS.

Henderson's EVER-BLOOMING HONEYSUCKLE

Lonicera Hendersonii. Large clusters of yellow trumpet-shaped blooms, changing the second day to orange-red on every young twig throughout the entire growing season, thus becoming a true ever-bloomer. Both colors, red and yellow, show clearly in each cluster as long as it lasts. Healthy grower, with a tendency to climb very high. The clusters are larger and longer than the ordinary Honeysuckle, are borne on longer stalks, hold better, and are valuable for cut flowers. Price, 2-year plants, 40c. each, \$4.00 per doz.

ASSORTED HONEYSUCKLES.

ASSORTED HONEYSUCKLES.

Lonicera Brachypoda. (Evergreen Sweet-Scented Honeysuckle). A hardy vigorous grower; blooms freely and is deliciously fragrant; flowers buff yellow and white. Exceedingly useful for covering the ground on banks and terraces. Price, large plants grown in open ground one year 25c. each, \$2.50 per doz. (See cut.)

Lonicera Flexuosa. Large flowers; pale yellow and white.

Lonicera Halleana (Hall's Japan Honeysuckle.) Pure white flowers, changing to yellow. Very free-blooming and fragrant.

Lonicera Heckrotti. A valuable ever-blooming variety; flowers bright carmine-red, with yellow and buff markings at the ends of the tubes; deliciously fragrant. Price, strong 2-year old plants, 30c. each, \$3.00 per doz.

Lonicera Brachypoda Aurea (Golden-leaved Honeysuckle). Flowers yellow, white and buff. Foliage veined and mottled yellow.

Price, except where noted, large plants, grown in open ground one year, 20c. each, \$2.00 per doz., \$12.00 per 100.

HARDY CLIMBING PLANTS.

Ampelopsis Veitchii, sometimes called "Boston Ivy" and "Japan Ivy." Entirely hardy in the most exposed places, attaining a height of 20 to 30 feet in two or three years clinging to stones, brick or wood work with the greatest tenacity. It is a great protection to houses, as the leaves lapping over each other like slates on a roof, effectually prevent rain from penetrating the walls. For covering dead trees, gate posts, walls, etc., it has no equal. In the summer the foliage is a rich shade of green, but in the fall it assumes the most gorgeous tints of scarlet, crimson and orange. Pot-grown plants, ready now. Ampelopsis Quinquefolia. The well-grown Virginia Creeper.

Akebia Quinata. Rich dark green foliage and curious dark brown flowers; delicious odor. Apios Tuberous-rooted Wistaria). Clusters of rich, deep purple flowers, which have a strong, delicous violet fragrance. Price (tubers), 15c. each, \$1.50 per doz.

Aristolochia Sipho (Dutchman's Pipe). Large, showy, light green foliage; flowers long and pipe-shaped; makes a dense screen. Price, 50c. each, \$5.00 per doz.

Bignonia Grandiflora (Trumpet Creeper). Rich, orange-scarlet, trumpet-shaped flowers. Chinese Matrimony Vine (Lycium Chinense). Bright purple flowers, scarlete berries.

Officinalis). White flowers, blooms in summer.

Ivy (English). Valuable for covering graves, grows well in shade. See page 44.

Wistaria Sinensis White. Flowers pure white. Price, 60c. each, \$6.00 per doz.

Wistaria Blue. Flowers lavender blue. Price, 50c.each, \$5.00 doz.

Price, except where noted, 25c. ea., \$2.50 per doz.

Note—All the above ready Oct. 20.

Note-All the above ready Oct. 20.

The Fleecy-White Fragrant Clematis, CLEMATIS PANICULATA.

This grand climbing vine, one of the most valuable ever sent to us from Japan—the source of so many floral wonders—is well worthy of a place on pretentious dwelling or humble cottage. Blooms in the early fall and is one mass of fleecy-white fragrant flowers. These are succeeded by the silken seed vessels almost as ornamental as the flowers. It will grow fifteen to twenty feet; in a season, it is insect-proof, it is perfectly hardy, it adapts itself to all situations, thrives everywhere, and need only be seen to be admired. Price, strong 2-year plants, 25c. each, \$2.50 per doz.; 1-year plants 15c. each, \$1.50 per doz., \$10.00 per 100.

HARDY CLIMBING ROSES.

DR. W. VAN FLEET. The color is a remarkably delicate shade of flesh pink on the outer surface, deepening to rosy flesh in the center. The flowers are full and double, of delicate perfume, buds pointed. The foliage large and glossy, with spines of a bright bronze red, immune from mildew. Ready now. Price, 1st size, 75c. each, \$7.50 per doz.; 2d size, 60c. each, \$6.00 per doz.; 3d size, 30c. each, \$3.00 per doz. Strong 2-year plants from open ground, ready Oct. 20th, 50c. each, \$4.50 per doz.

per doz. Strong 2-year plants from open ground, ready Oct. 20th, 50c. each, \$4.50 per doz.

SILVER MOON. Silver Moon is the result of a most interesting cross, Rosa Wichuraiana X Rosa Sinica—Cherokee rose. The flowers run four and one-half inches and over in diameter, clear silver white in color, petals of great substance and beautifully cupped. The center is filled with bright yellow stamens, a very attractive feature. (See cut). Price, strong 2 years plants from open ground, ready Oct. 20th, 50c. each, \$4.50 per doz.

DOROTHY PERKINS. The color is a beautiful, clear shell-pink; it blooms on trusses of from ten to thirty, each flower considerably over one inch in diameter. We supply White Dorothy at same price. Price, plants from open ground ready Oct. 20th, 30c. each, \$3.00 per doz.

EXCELSA. A Climbing Rose, remarkable in many ways but particularly in the brilliant fiery-red, or intense crimson-scarlet of the flowers. The flowers are very double they are larger than any of the Rambler Roses. Price, field grown plants, ready Oct. 20th, 40c. each; \$4.00 per doz.

Note.—We can also supply the Crimson Rambler and the general assortment of Hardy Climbing Roses offered in our Spring catalogue. Price, 30c. each, \$3.00 per doz.; plants from open ground ready October 20th.

A selection of the best HARDY FLOWERING SHRUBS for the home grounds

HARDY FLOWERING SHRUBS. Ready October 20th.

*Philadelphus Coronarius, 8 to 10 ft. (D) (Common Syringa). White flowers, sweet scented.

*Philadelphus Lemoneii, 6 to 8 ft. (D) A vastly improved variety.

Philadelphus Follis Aureus, 4 to 6 ft. Handsome yellow foliage.

Prunus Pisardi, 10 to 12 ft. Foliage, fruit and shoots bright purplish-red.

Prunus Triloba, 4 to 6 ft. (E) (Double-flowering Plum.) Pink flowers. (See cul).

Rhodotypus Kerrioides, 6 to 8 ft. (C) Large, single flowers, white.

*Ribes Missouriensis, 5 to 8 ft. (I) (Flowering Current.) Yellow flowers.

Robina Hispida, 4 to 5 ft. (F) (Rose Acacia.) A handsome shrub with long racemes of beautiful rose-colored flowers, 50c. each.

Sambucus Aurea, 5 to 7 ft. (Golden-leaved Elder.) A very attractive shurb.

HARDY FLOWERING SHRUBS. Ready October 20th.

Below we offer a carefully selected list of hardy shrubs, to which we invite the manes indicate the season of blooming, thus; A. April blooming; B. May: to October; H. July and August; I. (I) Sprin A New Hardy Snow-White Shrub Hydrangea.

Hydrangea Arborescens Grandiflora Alba. A variety of the native H, arborescens. The heads of flowers are in shape like H. hortensis; they are snowy white. It is a true shrub, begins to bloom in early summer and continues into the fall, so that it is practically ever-blooming After H. paniculata grandiflora has lost its color this variety is still fresh, eventually turning to a light green and then brown. It attains a height of 6 feet and the same width and is literally loaded with its grand panicles of large snowy white flowers, one of the grandest sights imaginable. Price, 2-year old plants, 50c. each, \$5.00 per doz. (Ready Oct. 20.)

Hydrangea Panicula Grandiflora. This is the most popular hardy shrub in cultivation. It attains a height of 4 to 6 feet; perfectly hardy in all parts of the country. The flowers are white, when first open but change to pink; they are borne in immense pyramidal panicles nearly a foot in length. It commences flowering in August and continues in bloom the rest of the season. Price, 2 to 23 feet high, 25c. each, \$2.50 per doz., \$15.00 per 100. (See cut.) (Ready Oct. 20th.)

Tree Hydrangea. Grown as "standards;" fine specimens about 4 feet high, 60c. each, \$6.00 per doz. (Ready Oct. 20th.)

CALIFORNIA PRIVET FOR HEDGES.

The illustration opposite shows a section of a hedge of the famous California Privet. Of all the shrubs which have been tried for shrubs which have been tried for hedging, none can compare with this. Of easy growth and splendid foliage, free from insects. Its inexpensiveness alone would give it first place for the purpose. It is now planted by the million annually. Ready October 20th. Price, strong shrubs, 1½ to 2 ft. high, 75c. per doz., \$4.00 per 100, \$35.60 per 1000; extra strong, 2 to 3 ft. high, \$1.00 per doz., \$6.00 per 100, \$55.00 per 1000.

Our pamphlet on the Culture and Care of California Privet sent free on applicaGRAPE

CONCORD

NEW HARDY RED GRAPE. Ready Oct. 25th.
Caco or Catawba-Concord. A cross between the old favorite Catawba and the well-known Concord. It ripens a little in advance of the Concord. This variety fully equals the Concord in strength and rapidity of growth and is very hardy. The color is a rich sparkling wine-red, with abundant bloom, Bunch large; berry medium to large and almost round. The crowning merit, however, is its quality, surpassing in tenderness of pulp, lucsious flavor and aroma the Catawba, while it is as prolific as the Concord. (See cut.) Price, 2 year vines, 75c. each; \$7.50 per doz.

HARDY BLACK GRAPE. Ready Oct. 25th.

Campbell's Early. E. Some points of special merit in Campbell's Early are a very strong, vigorous, hardy vine, with thick, heavy, mildew-resisting foliage, and bearing abundant clusters; very large, compact and handsome. Berries large, often an inch or more in diameter; black with light purple bloom; skin thin, but very tenacious; flesh firm but tender, parting easily from its few and small seeds. Flavor rich, sweet, slightly vinous, free from foxiness. Its season is very early, and its keeping qualities remarkable having hung upon the vines sound and perfect for six weeks or more after ripening with no tendency to fall off or shell from stem. Price, 2-year vines, 30c. each; \$3.00 per doz. each; \$3.00 per doz.

HARDY WHITE GRAPE. Ready Oct. 25th.

Green Mountain. E.E. (Winchell.) This, the earliest white grape, has been thoroughly tested over a wide area, and has proved most satisfactory. It combines hardiness, fruitfulness. vigor, good size and excellent quality. Bunch medium, to large, shouldered; berries medium, greenish-white; skin thin, tough, pulp tender, sweet, with few seeds; the flavor is excellent. Price, 2-year vines, 50c. each, \$5.00 per dos.

worden. E. Black, very juicy, large size; early. One of the grandest grapes for family use.

Wilder. M. (Rogers' No. 4.) An excellent variey.
Berries medium; bunches large; color black.

Price, except where noted, 25c. each, \$2.50 per doz.

GOOSEBERRIES. Ready Oct. 25th.

Downing. Fruit large, pale green, of excellent quality, both for cooking and table use. 2-year plants. Price, 15c. each, \$1.50 per doz., \$10.00 per 100. Houghton's. Seeding A native variety, very prolific bearer, light-colored fruit. 2-year plants. Price, 10c. each, \$1.00 per doz., \$7.50 per 100. Red Jacket. A fine red variety, a vigorous grower and immense yielder. 2-year plants. Price, 15c. each, \$1.75 per doz., \$12.00 per 100. Industry. A pronounced favorite in England and recognized as a standard sort for this country. A vigorous grower, bears large red fruit in great abundance. 2-year plants. Price, 20c. each, \$2.00 per doz., \$15.00 per 100.

RHUBARB ROOTS. Ready oct. 25th.

St. Martin's. It is not only immensely productive, but it is also one of the earliest, and has a rich spicy flavor, 15c. ea., \$1.25 per doz., \$8.00 per 100.

Linneaus. Bright red stalks. 10c. each, \$1.00 per doz., \$6.00 per 100.

STRAWBERRY PLANTS. Grown.

Space will not permit us to give descriptions of the many varieties which we offer, all of which are fully described in our Strawberry Catalogue, a copy of which may be had upon application. In ordin-ary seasons if these are planted before Oct. 20th some fruit should be produced the following year.

CURRANTS. Ready Oct. 25th.

Perfection. Awarded the Barry Gold Medal by the Western N. V. Horticultural Society because of its superior merit; the first fruit to achieve this distinction. It is a beautiful Currant; the color is a particularly bright red. Berry and bunch are larger than Fay's Prolific and the size is well maintained to the end of the bunch. A valuable feature is its long stem from the bush to the first berry making it easy to pick without crushing the fruit. It is a great bearer superior to any other large sort. Pich, mild, sub-acid, plenty of pulp with few seeds. Less acid and of better quality than any other large currant in cultivation. Price, 20c. ea., \$2.00 per doz., \$15.00 per 100.

Fay's Prolific. Bunch and berries very large, bright,

Fay's Prolific. Bunch and berries very large, bright, attractive red even when fully ripe; remains in good condition for eating a long time. Quality superb not very acid, very prolific. Price, 15c. each, \$1.50 per doz., \$10.00 per 100.

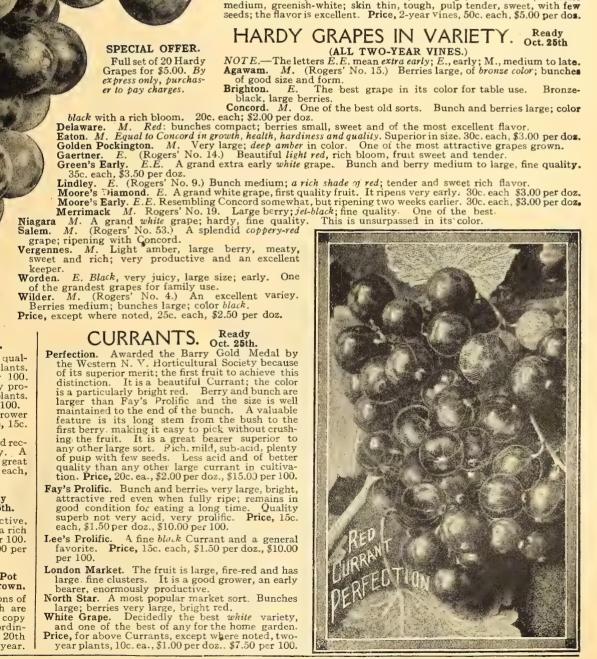

I.ee's Prolific. A fine black Currant and a general favorite. Price, 15c. each, \$1.50 per doz., \$10.00 per 100.

London Market. The fruit is large, fire-red and has large fine clusters. It is a good grower, an early bearer, enormously productive.

North Star. A most popular market sort. Bunches large, berries very large, bright red.

White Grape. Decidedly the best white variety, and one of the best of any for the home garden.

Price, for above Currants, except where noted, two-year plants, 10c. ea., \$1.00 per doz.. \$7.50 per 100.

Our pamphlet "THE GARDEN CULTURE OF SMALL FRUITS" will be sent free to customers on application.

LACKBERRIES.

Ready Oct. 25th.

(If wanted by Parcel Post add 10c. per doz.)

(If wanted by Parcel Post add 10c. per doz.) Solvers. A new variety, named after the introducer. It has made a high reputation already for quality and productiveness. In size it is the largest, 27 berries filling the regular market box to a level. A strictly fancy variety. Price. 10c. each, \$1.00 per doz., \$7.00 per 100.

Early Harvest. Berries uniform, glossy black. Very early.

Early King. A grand early variety. Its delicious sweetness renders specially valuable for the home garden.

Eldorado. The berries are very large, jet-black, borne in large clusters and ripen well together; they are very sweet and melting; have no hard core. Price, 10c. each, 75c. per doz., \$5.00 per 100.

Erie. Canes of ironclad hardiness, strongest growth, free from all diseases, and wonderfully productive. Berry largest size, excellent quality, handsome and firm; early. Price, 60c. per doz., \$4.00 per 100, \$30.00 per 1000.

Mesereau. A mammoth early, ironclad, hardy berry. Exceptionally sweet and melting, being without core. An enormous yielder. 75c. per doz., \$5.00 per 100.

Rathbun. The fruit is very large and handsome, intense black with a very high polish and without any hard core, juicy, high flavored, of so superior a quality that it is in a class by itself. This has some Dewberry blood in it and does best from New York City southward. (See cut.) Price, 10c. each, \$1.00 per doz., \$5.00 per 100, \$40.00 per 1000.

Snyder. Wonderfully productive; sweet and juicy.

Wilson Junior. Takes the place of the old Wilson Early.

Dewberry, Lucretia (or Creeping Blackberry). Conceded to be the finest of its class, as early as Early Harvest, and as large as the Erie Blackberry.

Premo. An early Dewberry, the crop is off before Lucretia is ripe. Large luscious berries.

Price (except where noted), 50c. per doz., \$3.50 per 100, \$25.00 per 1000.

luscious berries.

Price (except where noted), 50c. per doz., \$3.50 per 100, \$25.00 per 1000.

Blackberries by parcel post, 10c. per doz., extra.

Raspberries Black Varieties. Oct. 25th

(If wanted by Parcel Post, add 10c. per doz.)

(If wanted by Parcel Post, add 10c. per doz.)

Black Diamond. A berry very popular among western New York growers, a fruit center that stands among the very first. Valuable for evaporating, canning and home consumption. One of the strongest growers making an abundance of good, clean wood which ripens up well in the fall, thus enabling it to withstand the cold winters remarkably well. Fruit jet black and juicy with few seeds. Price, 75c. per doz.; \$5.00 per 100.

Columbian Most desirable for the garden, a seedling of the Cuthbert, which grew near a Gregg. Vigorous, hardy, productive, fruit of large size and great excellence. Color, dark purple. Price, 10c. each, 60c. per doz., \$4.00 per 100, \$35.00 per 1000.

Cumberland. In size the fruit is simply enormous, the berries measuring seven-eighths and fifteen-sixteenths of an inch in diameter, but in spite of this, the fruit is possessed of unusual firmness. Extremely vigorous and remarkably free from disease. Price, 10c. each, 75c. per doz., \$4.00 per 100.

Gregg. A standard black variety.

The "Munger." The fruit is black and resembles Gregg very much. It is a better-flavored berry than Gregg, tougher in texture, and therefore a better shipper. In sizeit excels Gregg, and is extra fine for the table and preserving. Price, 60c. per doz., \$4.00 per 100, \$30.00 per 1000.

Ohio. Exceedingly productive, very hardy, excellent quality, good size.

Older. Strong growth, branching freely, plant 3½ x 6 ft. apart. Fruit, juicy, excellent flavor, and jet black.

Price for the above (except where noted), 50c. per doz. \$3.00 per 100, \$20.00 per 1000.

Price for the above (except where noted), 50c. per doz. \$3.00 per 100, \$20.00 per 1000.

RED RASPBERRIES.

Ready Oct. 25th.

(If wanted by Parcel Post, add 10c. per doz.)

Cardinal. This wonderfu berryi's a surprise in the tulness of its merits, great growth, extreme hardiness and wonderful productiveness. It will grow 10 feet high and bear accordingly, producing its choice, rich, red, pureflavored fruit in marvelous abundance. Leading horticulturists who have seen the berry say it is one of the wonders of the century. Price, 10c. each, 75c. per doz., \$5.00 per 100, \$40.00 per 1000.

Cuthbert. The leading market variety. Canes hardy; large, healthy foliage. Befries large dark crimson, good flavor.

Golden Queen. (Yellow.) The most popular and best yellow raspberry yet introduced. Price, 75c. per doz., \$5.00 per 100, \$40.00 per 1000.

Haymaker. A purple raspberry, not so dark as Columbian, larger and firmer than that fine sort. One of the most productive berries ever grown, yielding over 200 bushels to the acre. 75c. per doz., \$5.00 per 100.

Miller. An early variety, large fruited and profuse bearer; vigorous grower, with large and abundant foliage; color brilliant red; sweet luscious flavor.

Thompson's Early Prolific. A fine, early, hardy raspberry for general cultivation. An excellent grower, bright crimson.

The King. The earliest red raspberry grown. Large fruits, firm, beautiful light crimson color; the quality is excellent. 60c. per doz., \$4.00 per 100.

Price for the above Raspberries (except where noted), 50c. per doz., \$3.00 per 100, \$20.00 per 1000. Cardinal. This wonderfur berry is a surprise in the tulness of its merits, great

Red Raspberry,

ST. REGIS.

We have pleasure in offering this fine, new, almost sensational fruit, destined we believe to be the most popular ever introduced.

It is the earliest of all red raspberries; beginning to ripen in New Jersey from June 15th to 20th—just as the strawberry crop is

It is wonderfully prolific; the first or main crop being far greater than that of any other red variety known; it succeeds upon all soils, and the canes are absolutely hardy.

and the canes are absolutely hardy.

It fruits on the old canes in generous quantities until late in August. By that date berries begin to ripen upon the young canes, which continue to produce berries in increasing numbers until severe frost.

The berries are a bright crimson, of large size and surpassing quality—rich, sugary, with full raspberry flavor. They are of exceedingly meaty, firm texture and keep in good Condition longer after being gathered, than any other red raspberry.

other red raspberry.

The canes are of stocky, strong growth with a great abundance of dark green leathery leaves, that never scald nor sunburn. (See cut.)

Price, strong transplanted plants, 20c. each, \$2.00 per doz., \$12.00 per 100.

HENDERSON'S PALMETTO ASPARAGUS

HENDERSON'S TESTED VEGETABLE SEEDS

Selected for Fall Sowing

VEGETABLE SEEDS PURCHASED IN PACKETS, OUNCES, OUARTER POUNDS AND POUNDS MAILED FREE. PUR-CHASER PAYS TRANSPORTATION ON BEANS AND PEAS BY THE PINT AND OVER. SEE PAGE 64 FOR DETAILED INFORMATION ON ZONE RATES.

HENDERSON'S

PALMETTO ASPARAGUS ROOTS.

(Ready in November for the South, in March and April for the North.) We advise Spring planting in the latitude of New York.
Buyer pays transit charges on Asparagus Roots.
For Parcel Post Zone rates see page 64. 100 2-year old Roots will weigh 5 lbs. 100 3-year old Roots will weigh 10 lbs.
The Palmetto is the best Asparagus grown; it is not only larger and much earlier, but is also a better yielder, and more even and regular in its growth than any other variety. Average bunches, containing fifteen shoots, measure 13½ inches in circumference and weigh about two pounds. The Palmetto is equally well adapted for all sections North and South. Asaving of 1 to 2 years is effected by planting roots. (See engraving.)

Per 100 Per 1000 2-year-old roots.

Per 100 Per 1000\$1.50 \$10.002.00 16.00 2-year-old roots, . . 3-year-old roots,

HENDERSON'S SUCCESSION CABBAGE.

HENDERSON'S

Early Jersey Wakefield Cabbage.

This famous Cabbage was introduced by us, and still retains its lead as the best first early in cultivation. Among its merits may be mentioned its large size of head for an early sort, and its uniformity in producing a crop. The heads are of pyramidal shape, with blunt peaks, and are remarkably solid. The outside leaves are small, though of great substance, enabling the plants to stand severe weather. Our seed is from highly bred selected stock and is unequalled. (See engraving.) 10c. pkt., 35c. oz., \$1.20 1 lb., \$4.00 lb.

HENDERSON'S

Early Charleston Wakefield Cabbage.

This is the large Early Cabbage, which we bred from the Early Jersey" Wakefield, to meet a demand for a larger heading sort. It possesses all of the valuable characteristics of the parent with the advantage of the heads being fifty per cent. larger, though a few days later. Our strain of the seed is very superior.

10c. pkt., 40c. oz., \$1.25 \(\frac{1}{2} \) 1b., \$4.50 \(\text{ lb.} \)

Henderson's Early Summer Cabbage.

This peerless variety was introduced by us, it is the best second Early Cabbage, makes a large, solid, round flat head averaging 8 to 10 pounds each, coming in about ten days later than Wakefield.

10c. pkt., 40c. oz., \$1.25 ½lb., \$4.50 lb.

Early Market Cabbage.

This Danish production is highly praised by all who have grown it. Its uniformity to type is marvellous. Every row and every head in the row looks as nearly alike as if all had been turned out of a mold. Early Market Cabbage is but three or four days later than our Early Jersey Wakefield, and will yield a greater crop per acre than any other early Cabbage. For home use its remarkably fine quality and tenderness will be greatly appreciated.

preciated. 10c. pkt., 3 pkts., 25c., 60c oz., \$2.00 ½ lb.

Henderson's Long Season Spinach.

It forms a dense rosette of thick, tender and succulent, crumpled leaves of intensely dark green color; their great substance and short leaf stalks enable them to "stand up" in hot weather, retaining their freshness for a long period after cutting. There is no other variety that will stand so long without running to seed and remain in an edible condition. It is the best variety to be sown at monthly intervals for a successional supply (See engraving.)

5c. pkt. ,10c. oz., 20c. 1 lb., 60c. lb.

HENDERSON'S SNOWBALL CAULIFLOWER.

HENDERSON'S LONG SEASON SPINACH.

Henderson's Succession Cabbage. Finest Cabbage in Existence, Whether for Medium Early, Main Crop or Winter Use.

It comes in a few days later than Early Summer, but is of nearly double the size and is absolutely true to its type under all conditions. We recommend it either for the market gardener trucker or private planter, as it is a perfect cabbage in every respect, not only being of the largest size, but of handsome color and of the finest quality. It is a safe variety for an amateur to plant, as it does well at all seasons, and one is almost sure of getting a crop, no matter when it is planted. (See engraving.)

10c. pkt., 45c. oz., \$1.40 \(\frac{1}{2}\)lb., \$5.00 lb.

Henderson's Snowball Cauliflower.

The standard everywhere for quality, and the only Cauliflower that is absolutely certain to head (conditions being congenial), forming a perfect snow-white head, averaging nine inches in diameter. Beyond question the best cauliflower for either early or late, for family or market garden, for forcing or cold frames; it heads where others fail. It is the earliest of all Cauliflowers. Its close-growing, compact habit enables one-third more to be planted on the same space of ground than can be done with any other variety. For forcing under glass during winter and spring, Henderson's Snowball is peculiarly well adapted, from its dwarf growth and short outer leaves, and for this purpose no other Cauliflower is now so largely grown. (See engraving.)

25c. pkt., \$4.00 oz., \$12.50 ½ lb. \$46.00 lb.

Henderson's Big Boston Lettuce.

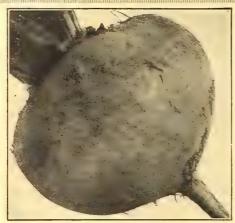

This grand variety, introduced into cultivation by us several years ago, has proved to be most valuable, steadily gaining in popularity until it is now more extensively grown than any other kind of Lettuce, either for the private table or for sale. North, South, East or West; whether grown in the open ground for summer and fall use, in frames for spring, or forced cool in green houses for winter use, it invariably gives both grower and user the utmost satisfaction, producing during all seasons, under ordinarily favorable conditions, large, butteryyellow heads, packed with thoroughly blanched leaves, crisp, tender, sweet and white, delighting both the palate and the eye. It is peculiarly adapted for the late fall culture; large areas of it may be seen in the vicinity of New York as late as Nov. 15th; a slight covering of salt marsh hay protects the plants from hard frosts, and when cut the leaves are as fresh, bright and untinged as if in midsummer. (See engraving page 50.)

10c. pkt., 25c. oz., 70c. 1 lb. \$2.00 lb.

VEGETABLE SEEDS FOR FALL SOWING

HENDERSON'S TESTED FARM SEEDS

HENDERSON'S FALL WHEAT CIRCULAR

-IS NOW READY-

It gives the latest quotations for Wheats, Grasses, Clovers, etc., for Fall Sowing.

It is sent Post Free to all applicants.

For our complete list of Tested Farm Seeds see

HENDERSON'S FARMERS MANUAL

48 pages, fully illustrated.

Sent Post Free to all applicants.

New Giant Early Flowering Spencer Sweet Peas.

BLOOM 4 WEEKS EARLIER THAN THE LATE SPENCERS

---- and under congenial conditions-

FLOWER CONTINUOUSLY FOR 4 MONTHS PRODUCING PROFUSELY, IMMENSE, WAVED FLOWERS "FOURS" PREDOMINATING, ON LONG STEMS.

WILL SUPERSEDE ALL OTHER TYPES OF SWEET PEAS FOR WINTER FLOWERING UNDER GLASS AND FOR OPEN GROUND CULTURE -FALL OR WINTER SOWN-IN WARM CLIMATES.

FALL OR WINTER SOWN—IN WARM CLIMATES.

We are glad at last to be able to offer a limited quantity of seeds of this revolutionary race of "Giant Early Flowering Spencer Sweet Peas" which has been developing for several years from "Spencer" crosses with the early flowering grandifloras which were evolved from the old Blanche Ferry and Emily Henderson types whose blood is responsible for all of the best Early Flowering Sweet Peas. The plants of this new race are of strong constitution, vigorous growers, profuse and continuous bloomers for about four months, grown under congenial conditions and they begin flowering, grown in the open ground, in about 106 days from seed sowing or fully four weeks sooner than late flowering Sweet Peas sown at the same time, and they continue to flower in profusion for fully 4 months and in favored localities even longer. It is predicted by Sweet Pea authorities that this race will supplant all other early and late flowering Sweet Peas for winter flowering under glass, which has now become so popular—and also for open ground culture in our Southern States—sown preferably in fall or winter. Their adaptability to warm climates—where cool weather-loving sweet peas do not thrive—has been proven and it is possible that they will eventually supplant the latter in American gardens where climatic conditions are not always favorable to the best developments of the older types of Sweet Peas. Practically all Sweet Pea Colors are now in existence in this new race. Under green house culture with proper treatment, plants from seeds sown the middle of August begin blooming the middle of March. Condensed cultural instructions for both garden culture under northern and southern conditions and for winter flowering under glass are given in Henderson's Brochure "How to Grow Sweet Peas to Perfection" free to customers.

THE VARIETIES OF NEW GIANT EARLY FLOWERING SPENCER SWEET PEAS.

We are now able to offer as long as unsold:

Early Morning Star. Deep orange-scarlet or flame color with rich orange pink wings—practically the same coloring as the late flowering variety known as "Dobbies Thomas Stevenson." The flowers are large and of the best waved Spencer form and borne on long stems in threes and fours in wonderful profusion; under glass it is magnificent and by artificial light its coloring is superb. Per packet of 15 seeds 25c; 100 seeds \$1.00.

Early Song Bird. A beautiful soft shade of pale pink similar to the late varieties "Florence Morse" and "Lady Evelyn Eyre." and a bit lighter than "Elfrida Pearson." The flowers, of the largest size, are well placed on long stems in threes and fours. In full growth it seems as if every stem carried four blossoms. We are sure it will be the leading pale pink for winter forcing.

Per packet of 25 seeds 25c.; per 100 seeds 75c.

Early Melody. A deeper shade of rose pink than the preceding. Closely resembling the late flowering "Countess Spencer" and "Hercules." The large, well waved flowers are borne mostly in fours on long stems and the effect when bunched is most pleasing. It is very floriferous and is sure to be a great favorite. Per packet of 25 seeds 25c.; per 100 seeds 75c.

Early Spring Maid. An exquisite light cream-pink that is a soft pink over a cream ground color. Similar in coloring to the late variety "Mrs Hugh Dickson" and the flowers have the same splendid characteristics. It is most effective and carries a great wealth of blossoms borne in fours on long stems. Per packet of 25 seeds 25c.; per 100 seeds 75c.

Early Snowflake. Pure white and the best white early flowering white seeded Spencer in existence. The flowers are very large and of the best waved Spencer form—every bit as good as the best strains of any late flowering white Spencer and they are borne in wonderful profusion on long stems. Per packet of 15 seeds 25c.; per 100 seeds \$1.00.

Early Heather Bell. A rich pleasing mauve-lavender, similar but superior in every way to the variety known as "Anita Wehrman." The flowers are of large, bold, waved Spencer form and are borne in fours and threes on long stout stems. A popular color shade for any occasion.

Per packet of 25 seeds 25c.; per 100 seeds 75c.

Per packet of 25 seeds 25c.; per 100 seeds 75c.

Yarrawa. This newcomer from Australia has proven its adaptability to American conditions, growing as luxuriantly and producing its long stemmed, giant waved flowers as quickly and in the same continuous profusion as if growing in the warm climate of the Antipodes. In our trials, it commenced flowering freely two weeks before other large waved Sweet Peas and three to four weeks earlier than some varieties, all given the same cultural treatment and "Yarrawa" continued in flower, holding its large size and phenomenal floriferousness for weeks after all other Sweet Peas had passed their best. The flowers are large of round waved Spencer form and colored bright rosepink with lighter pink wings. The exquisite coloring is most effective either by daylight or artificial light and, moreover, the flowers are deliciously fragrant. Per packet of 25 seeds 15c.; per 100 seeds 50c.; per oz. \$1.25.

The following Early Flowering Spencer Sweet Peas we offer only under color. They are selections—trued up and we believe to be "fixed." All are large waved early flowering Spencers. All are sold at the uniform price of 15c. per packet of 25 seeds; 50c. per 100 seeds; \$1.25 per oz.

Barly Red Spencer. A rich bright crimson, similar in coloring, form, and size of flower to King Edward Spencer.

Early Shell Pink Spencer. Charming shell-pink of a little warmer tone than Countess Spencer: very large waved flowers.

Early Apricot Pink Spencer. A rich apricot pink or salmon colored flower; large, long stemmed flowers.

Early Rose Spencer. Bright carmine-rose, similar in coloring, size and form

of flower to John Ingman.

Early White Spencer. White seeded, large waved, pure white flowers.

Early Duplex White Spencer. Black seeded, pure white waved flowers. many of which come doubled.

Early Lavender Pink Spencer. Large waved flowers of exquisite pinkish

IN THE SOUTH AND WHERE WINTERS ARE MILD, SWEET PEAS DO BEST WHEN SOWN IN THE FALL.

The Sweet Pea is a cool weather loving plant and therefore for best results in the South, on the Pacific Coast and in other mild winter localities, the seeds should be sown in the fall or early winter. Even in the North the sowing of Sweet Peas in the fall is growing in popularity. When they are successfully carried through the winter they commence flowering much earlier and are larger, finer and more continuous bloomers than from spring sown seeds particularly when summer weather turns out hot and dry. The reason is that the plants from fall sown seeds develop a much better root system and therefore are less susceptible to uncongenial conditions. Sweet Peas sown in the fall should be in raised beds or banked up if in rows so water will not stagnate around them as it might cause them to rot and the seeds should be put in late enough so the seedlings will not get above ground—yet early enough so the seeds will germinate which will require about 2 weeks. After the ground has a thin frozen crust then protect with a 6-inch mulch of straw, hay, leaves or similar material.

WINDOW BOXES, PLANT STANDS, TUBS, ETC.

SELF-WATERING IRON WINDOW BOXES.

These are made of sheet iron, galvanized and finished on the outside in green enamel. They are very durable, rust proof and positively will not leak.

The crowning merit of these boxes, however, is the self-watering feature. This is accomplished by a false bottom below which the water is contained, it being poured in through a tube in the corner that projects from the rim to the bottom. The false bottom has holes in it in which are inserted small sponges. These absorb the water and it is drawn up by the Soil or Fibre keeping it evenly moist for a week or more before the water requires replenishing, thus the plants do not dry out from neglect and thrive and bloom with unusual luxuriance.

No.	Height.	Width.	Length.	Water Capacity.	Price Plain.	Price Ornamental
1 4 7 10	8 ins. 8 " 8 "	9½ ins. 9½ " 9½ " 9½ "	23 ins. 29 " 35 " 41 "	2½ qts. 4 4 5½ "	\$1.75 2.25 2.75 3.25	\$2.30 2.90 3.50 4.00

Note.— The "Plain" self-watering Window Boxes have a smooth surface, enameled green; the "Ornamental" have a design pressed in the metal which, as illustrated, greatly improves the effect.

SELF-WATERING IRON HANGING POTS

The ordinary hanging baskets are usually an abomination when it comes usually an abomination when it comes to watering them on account of the drip, in consequence they are often allowed to "dry out" to the detriment of the plants. The Self-Watering Hanging Pots "never leak a drop" and plants thrive in them grown in either Soil or Fibre do not need water free plants thrive in them grown in either Soil or Fibre, do not need water often. To water the plants simply remove the lower reservoir—a partial turn will do it—fill it with water and replace. The Soil or Fibre will soon absorb the needed moisture through a connecting propers. Our prices do not include sponge. Our prices do not include chain. We will supply a solid brass chain for this purpose at 3c. per foot. In ordering chain, measure the distance from the point of suspension to where you want top of basket and or

where A	ou want top of basket	and order three times th	at amount.

BALL CELERY BLEACHER.

The home grower and private gardener will find this an ideal system of bleaching celery—handy, neat and just the thing to bleach a few stalks every few days as wanted.

It only takes a week or ten days after putting on these bleachers when your celery will be a beautiful white and all ready for the table. No banking with soil no hunting up boards, and it produces better results on early celery. The same bleachers can be used over and over again the same season.

Price of Bleachers, 6x12 inch 25c. per doz., \$1.50 per 100; 6½ x13 inch 30c. per doz., \$1.75 per 100; x14 inch 35c. doz., \$2.00 per 100. Mail weight per lozen 2 lb. The Ball Lightning Celery Handler, Spring Brass, \$3.50: mail weight 3 lbs.

Henders n's Hot Bed and Cold Frame Mats. To Protect Plants from Frost in Winter and Spring.

These are made of cotton drill, warmly lined with waste wool and cotton which is quilted in to hold position. A trial for two winters, proved they do not harbor mice or other vermin. They will not hold moisture, and will not rot or wrildew.

Size 40 x 76, \$1.60 each, \$16.50 per dozen.

"76 x 76, \$3.00" \$28.00"

RYE STRAW MATS

Being made in the best manner of long rye straw and best tarred cord they are invaluable for throwing over cold frames, hot beds, etc., during the coldest weather; they roll up and can be stowed in small space.

Prices. Size 3x6 feet, \$1.40 each; \$15.00 per doz.

Expanded Metal Rubbish Burner.

A very convenient basket-like arrangement durably made of expanded iron, 3/4 inch mesh, in which may be collected leaves, rubbish, paper, etc.; the lid is then shut and the litter burned in the open litter burned in the open air, with no danger of burning particles being blown around. (Measure-ments are inside.)

Prices.—No. 1. 14 in diameter, 16 in, high, \$2.75 No. 2. 15 in. diameter 20 in. high, \$3.00 No. 3 16 in. diameter, 24 in. high, \$3.50.

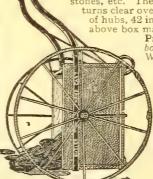

Portable Refuse Burner.

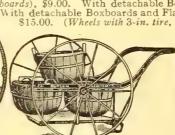

For the rapid and convenient destruction of all leaves, refuse and waste matter. In reality a two-wheeled hand cart (for which purpose it car also be used), made of iron and steel netting. Is fitted with broad-tired wheels, which enables it to be pulled on lawns or soft ground without injury. A steel pan is fitted under the axle which catches all the fire and ashes as they fall. This pan can be easily emptied as needed.

No. 1 Canacity Loubic yard.

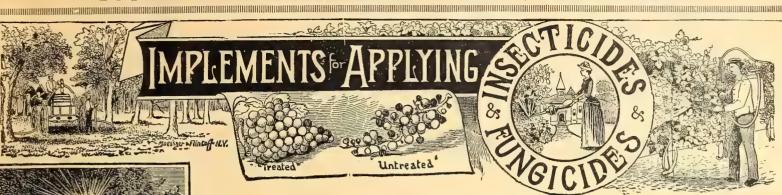

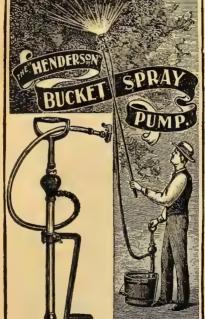

Send Implement Catalogue,

Auto Compressed Air Sprayer.

For Spraying Liquid Insectides and Fungicides on Garden or Green House Plants Shrubs, Trees, etc. Also Whitewash and Disinfectants to Poultry Houses.
Also Applies Fly Oils for Animal Protection.

One of the best spraying contrivances and the standard of all compressed air One of the best spraying contrivances and the standard of all compressed air sprayers. Can be used in every variety of spraying. Suitable for all garden work, five acres of field crops, a limited number of trees any size, also will handle whitewash and disinfectants in the Poultry House. Capacity about 4 gallons. Easily carried either by handle or shoulder strap. The pump is of heavy brass, large diameter. Two or three pumpings will empty the tank under high pressure. There are no screw connections in the construction of this machine and there are no parts likely to require renewing except in the ordinary course of long service. Made with tank either brass or galvanized iron, finished with Auto pop Nozzle No. 1, with which the spring is instantly controlled and is automatically self cleaning.

NET PRICES.
Auto-spray No. 1B Brass tank with Nozzle
Auto-spray No. 1 D, Galvanized tank with Nozzle
Two row attachment for spraying 2 rows at one passing
Brass Extension Pipes, 2-ft. lengths, each
Brass Elbow for spraying under leaves
Torch for burning worm's nests
Brass Strainer for straining solution

The "Henderson" Hand Bucket Pump.

This is the best and most durable portable hand pump in the market. Working parts are made of solid brass with large air-chamber and is double acting, throwing an absolutely continuous stream, either solid or in a fine spray as desired; very light and easily carried, and works from any bucket or tub. Just the thing for throwing carriages, windows, etc. (See cut.) Price, with 3 feet of hose and combination spray and stream nozzle, \$4.00, P.P. 9 lb.; or, with extra 7 feet section of hose and pole connection for tree spraying, \$5.00 P.P. 10 lb.

AUTO SPRAYER.

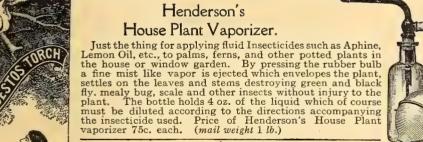

Henderson's Sheet Brass Sprayer.

Sprays fluids in the form of mist. Made entirely of sheet brass and will not corrode nor rust. Just what is needed for applying liquid insecticides and fungicides. The tapering point to the air-chamber gives great force to the spray. Holds one quart. Price, \$1.00 (mail weight 3 lbs.)

Solid Brass Compressed Air Atomizer.

The most perfect small hand compressed air sprayer made.
Delivers a continuous fog-like spray. Is fitted with straight and adjustable nozzles, making a perfect under leaf sprayer.
In fact, spray can be delivered at any angle or position desired.
Made in solid brass highly polished; holds I quart. Price, \$2.00 (mail weight 2 lbs.)

Jumbo Powder Gun.

For applying insect powders on plants in the house or small gardens; it will held about 4 ozs. of powder, which is ejected and distributed by a pressure with the thumb. The "Jumbo" we consider the best small powder distributor on the market.

Price, 25c. each.

The Asbestos Turch.

Attach the torch to the Attach the torch to the end of a pole of suitable length; saturate with kerosene oil, light and hold under the caterpillar nests and pass quickly along the branches and around the trunk of the tree where insects lodge. The heat instantly destroys the insects and will in no way injust the tree. way injure the tree.

Price, 35c each (mail weight 1 lb.)

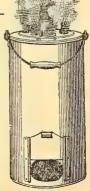

Greenhouse Fumigators for Smoking Plants. EUREKA FUMIGATORS.

For fumigating greenhouses with dampened tobacco stems; made of galvanized sheet iron; a damper regulates the draft; no danger of fire; no ashes or litter. No. 1, 12 ins. high, \$1.60; No. 2, 16 ins. high, \$2.75; No. 3, 20 ins. high, \$3.25; No. 4, 24 ins. high, \$4.50.

PERFECTION FUMIGATORS Make Moist Smoke.

This fumigator will last for years; it has a water tank between the This fumigator will last for years; it has a water tank between the fire and the outside, preventing burning out. The tank should be filled with tobacco water, from which a vapor arises and mixes with the dry smoke from the stems, producing a dampened smoke more dense and less injurious to delicate foliage than from any other fumigator made. Outside fumigating can also be done with the Perfection; the cast iron lid is made so a hose can be attached, and all the outlets for smoke (except through the hose) can be closed off. No. 1 holds one peck of stems, \$3.50; No. 2 holds half bushel of stems, \$4.25; No. 3 holds three-quarters bushel stems, \$5.00.

Our Implement Catalogue, mailed free on application, illustrates and describes a full line of Horse and Hand Power Spraying Instruments.

Henderson's Superior Fertilizer for House Plants.

A safe, clean and high grade fertilizer, free from disagreeable odor, prepared especially for feeding plants grown in pots. It is a wonderful invigorator, producing luxuriant, healthy growth, foliage of rich texture and larger and more

It contains in a highly concentrated form all of the ingredients of plant food essential to the highest development of plants and flowers. It is very soluble and is readily assimilated, so that marked improvement is usually noticed in ten days' time. It is fine and dry, clean and easy to apply, either sprinkled over the surface of the soil as a top dressing, or dissolved in water (stirring well). Detailed directions on each package.

PRICE, 12 oz. package, sufficient for 25 ordinary sized plants for one year, 25c. (mail weight 1 lb.)

HENDERSON'S GARDEN FERTILIZER FOR VEGETABLES AND FLOWERS

Strictly high-grade, highly concentrated, fine, dry and free from objectionable odor containing all the elements needed by vegetable and flowers for their quick growth, early maturing and perfect development. The ingredients are quickly soluble and immediately commence to feed the plants, stimulating them into healthy, luxuriant growth, and it continues to feed them until the

Easily applied, either before or after planting, by sprinkling over the surface Easily applied, either before or after planting, by sprinkling over the surface of the soil and raking in: or it can be mixed with water (stirring well) and applied as a liquid manure. If something especially fine in vegetables and flowers is desired, two or three additional applications, made at intervals, will produce magnificent results. A 5-lb package is sufficient for a space 15 x 20 for one application, or 500 to 600 lbs per acre. Instructions on each package.

Price, 5 lb. package, 30c.; 10 lb. package, 50c.; 25 lb. bag, \$1.00; 50 lb. bag, \$1.75; 100 lb. bag, \$3.00; 200 lb. bag, \$5.00 per ton, \$48.00.

THE HENDERSON LAWN ENRICHER.

ODORLESS-QUICK ACTING.

For New and Old Lawns, Tennis Courts, Putting Greens, etc., Quickly induces a Luxuriant Rich Green Growth.

a Luxuriant Rich Green Growth.

The constant mowing of grass, and removal of clippings also removes a proportion of digested plant food. Therefore if the luxuriance of a lawn is to be maintained, it must be top dressed, at least once a year, with suitable fertilizer. The Henderson Lawn Enricher is a clean and odorless lawn dressing which never fails in inducing a rapid and rich green growth. It should be sown broadcast in the spring or fall, and a remarkable improvement will soon be observed. If applied during the summer use half of the quantity and during rainy weather or water in thoroughly with a hose. The use of "Henderson Lawn Enricher" entirely does away with the old practice of top-dressing lawns with stable manure so objectionable on account of unsightliness, disagreeable odors, so often full of weed seeds. of weed seed

Quantity Required.—For forming a new lawn a 10-pound package is sufficient to go over an area of 300 square feet, or 1000 to 1500 pounds per acre, or a smaller quantity for renovating an old lawn. Apply broadcast with machine or by hand as evenly as possible on a quiet day and preferably just before rain. If applied during the summer use half the quantity and during rainy weather or water in thoroughly with a bose. with a hose

Prices—by Express or Freight—(purchaser paying transit charges), 5 lb. pkg., 30c.; 10 lb., 50c.; 25 lb. bag, \$1.00; 50 lb., \$1.75; 100 lb., \$3.00; 200 lb., \$5.00; per ton of 2000 lbs., \$46.00.

RAW BONE MEAL. This is ground fine, decomposes more rapidly in the soil than the coarser grades, and is therefore more quickly beneficial.

Quantity Required. For lawns pasture and mowing lands, ½ to 1 ton per acre. For trees and vines, 2 to 4 quarts each. For field and garden crops, ¾ to 1 ton broadcast and harrowed in. For rose beds, pot plants, etc., one part to about fifty of soil.

CLAY'S FERTILIZER. Price, 14-lb. bag, \$1.25; 28-lb. bag, \$2.25; 56-lb.

bag \$4.00; 112-1b. bag, \$7.00.

THOMPSON'S VINE, PLANT AND VEGETABLE MANURE. Price, 28-1b.

bag, \$1.75; 56-lb. bag, \$3.50; 112-lb. bag, \$0.75.

THOMPSON'S SPECIAL CHRYSANTHEMUM AND TOP-DRESSING
MANURE. 7-lb. bag, \$1.50; 14-lb. bag, \$2.50; 28-lb. bag, \$4.00; 56-lb. bag,

INSECTICIDES AND FUNGICIDES.

Powders and Soaps (those offered by the pound)—non poisonous—can be sent by Parcel Post if sufficient is added to the prices to pay postage (See page 64). Fluids (those offered by the quart, etc.), and poisonous powders are not mailable.

APHINE. It is a combination of oils combined with nicotine in a readily soluble form which can be easily diluted with water and applied as a spray, wash or dipping solution. It kills all insects, does not affect the most tender plants. Price, 1 gill, 25c.; ½ pint, 40c.; pint, 65c.; quart, \$1.00; gallon, \$2.50. ARSENATE OF LEAD. (paste form) A poison rapidly taking the place of Paris green. Price, 1 lb., 25c.; 5 lbs., \$1.00; 12½ lbs., \$2.50; 25 lbs., \$4.50; 100 lbs., \$14.00.

BOROWAX. A complete protection against tree borers if applied in accordance with instructions. Quantity required: ½ pint to a pint to a tree according to size. Price, quart, 35c.; half gallon, 60c.; gallon can (boxed), \$1.00; six gallons (boxed). \$5.00; half barrel, \$20.00; barrel, \$35.00.

"BLACK LEAF 40." An effective insecticide for sucking insects such as plant lice, aphis, red spider, leaf hopper, thrip, etc. Sprayed on dilute 2 teaspoonful to a gallon of water. It also forms a splendid combined spray for both insects and fungus with Bordeaux. Price, 1-oz. bottle, 25c.; ½-lb. tin, 75c.; 2-lb. tin, \$2.50; 10 lb. can, \$10.75.

BORDEAUX—ARSENATE OF LEAD

BORDEAUX—ARSENATE OF LEAD. A combination in proper proportions of these standard insecticide and fungicide remedies, thus killing insects and eliminating fungus plant diseases at one spraying and accomplishing the objects in half the time required to spray on separately. Quantity required, 1 to 2 lbs. in 10 gallons water. Price, 1 lb., 25c.; 5 lbs., \$1.15; 10 lbs., \$2.25; 25 lbs., \$4.75; 50 lbs., \$8.50; 100-lb. keg, \$15.00.

BORDEAUX MIXTURE, Paste. One gallon makes 50 gallons of spray. An indispensible fungicide. Price, 1 pint, 30c.; 1 quart, 45c.; 1 gallon, \$1.15; 5-gallons, \$4.75; 10 gallons \$9.00.

BUG DEATH. Is a non-poisonous, insect killing powder. Price, 20c. 1b.; 3 lbs., 45c.; 5 lbs., 60c.; 12½ lbs., \$1.25; 100 lbs., \$9.25.

COPPER SOLUTION, AMMONIATED. A Fungicide leaving no limy sediment. One quart is for 25 gallons of spray. Price, I quart, 65c.; I gallon, \$2.25.

FIR TREE OIL SOAP. Fir Tree Oil, prepared in soap form. An ounce makes 1 gallon. Price, ½ lb. tin, 25c.; 2 lbs., 75c.

FISH OIL SOAP. Makes an excellent wash for bark. Price, 15c. per 1b.; 5 lbs., 60c.; 25 lbs and over at 10c. per lb.

FORMALDEHYDE is a comparatively non-poisonous microbicide and antiseptic, etc. The dilution for most purposes is 1 lb. (1 pint) Formaldehyde to 15 or 20 gallons of water. Price (40 Volume %), 1 lb. bottle, 40c.; 5 lb. bottle, at 35c. lb.; 10 lb. bottle, at 30c. lb.; 50 lb. demijohn, at 25c. lb.; 132 lb. carboy, at 23c.

FUNGINE. An effective sulphurated remedy for mildew, rust and other blights. A spraying material which does not stain the foliage. Prices, half pint, 40c.; pint, 65c.; quart, \$1.00; gallon, \$3.50.

HELLEBORE. Powdered White. For the destruction of worms, etc. Can be used as a powder or dissolved, 1 oz. in 3 gallons of water. Price, 50c. per lb.; 5 lbs., \$2.25; 10 lbs., \$4.00.

KEROSENE EMLUSION. Ready for use by simply adding water (10 to 20 parts water to one of Emulsion.) For worms, scale, lice and all sucking insects. Price, 1 pint, 20c.; 1 quart, 35c.; 1 gallon, 85c.; 5 gallons, \$3.50.

LEMON OIL. For all insects and soft scales. ½ pint, 25c.; 1 pint, 40c.; quart, 75c.; ½ gal., \$1.25; 1 gal., \$2.00.

LIME, SULPHUR SOLUTION. A liquid compound for all scale insects on trees and shrubs as can be treated in winter. Price, quart can, 30c.; gallon, 75c.; 5 gallons, \$2.75; barrel of 50 gallons, \$10.00.

NIKOTEEN. An extract of tobacco for fumigating greenhouses. Price, 1 lb. bottle, \$1.50; 1½ oz. bottle, 40c.; ½ lb., 85c.; 4 lb., \$5.00; 8 lb., \$10.00.

NICO-FUME. A tobacco paper, strongly saturated with pure nicotine. It comes in strips, which, suspended and lighted, is one of the best, easiest, simplest and least injurious methods of fumigating. One sheet is sufficient for two thousand cubic feet. Price, air tight cans of two dozen sheets, 85c.; 1 gross sheets, \$4.00; 2 gross sheets, \$7.50.

PARIS GREEN. Price, ½ lb. package, 40c.; 1 lb. package, 60c.; 5 lb. package, \$2.50; 28 lb. bucket, \$12.00.

INSECT POWDER. PERSIAN OR BUHACH. Henderson's Superior Grade.

\$2.50; 28 lb. bucket, \$12.00.

INSECT POWDER, PERSIAN OR BUHACH. Henderson's Superior Grade.
An effective, non-poisoncus insect powder. Price, 35c. ½ lb.; 1 lb., 65c.

SCALECIDE. The best spray for San Jose scale, etc., not poisonous; mixes with cold water, 1 gallon to 20, to be applied fall, winter or spring while the foliage is off. Price, 1 quart, 40c.; 1 gallon can, \$1.00; 5 gallon can, \$3.75; 10 gallon can, \$6.75; 30 gallon barrel, \$16.50; 50 gallon barrel, \$27.50.

SLUG SHOT. A non-poisonous powder and a popular Insecticide. Price,

SLUG SHOT. A non-poisonous powder and a popular Insecticide. Price, per keg of 125 lbs, net, \$7.00; per barrel of 250 lbs. net \$13.00; for 10 lb. package, 60c.; 5 lb. package, 35c.; in tin canister, with perforated top for applying 25c. each. (mail weight 2 lb. each.)

SCOTCH SOFT COAL SOOT. This prevents insects in soil and also acts as a fertilizer. Price 50 lb. bag, \$2.50; 100 lb. bag, \$4.00.

SULPHUR, FLOWERS OF. Price, 10c. per lb.; 10 lbs, 60c.; 25 lbs. and over, at 5c. per lb.

TOBACCO O DUST, Fine. For green and black aphis, Price, 10c. per lb.; 35c.; 10 lbs, 60c.; 25 lb. bag, \$1.00, 50 lb. bag, \$1.75; \$3.00 per

TOBACCO POWDER FUMIGATING. Extra strong Havana Tobacco Dust for fumigating. Price, 25 lb. bag, \$1.50; 50 lb. bag, \$2.50; 100 lb. bag, \$4.00. TOBACCO STEMS. For fumigating greenhouses, etc. Price, 100 lbs., \$1.50;

per ton, \$25.00.

TREE TANGLEFOOT. No crawling insect can pass a band of tree tanglefoot.

Apply early in the spring—before the caterpillars commence to crawl—and again in the fall if troubled with the fall Canker worm. One pound for a sixfoot band 4 inches wide, 1 inch thick. Prices, 1 lb. can, 35c.; 3 lb. can, \$1.00; 10 lb. can, \$3.00; 20 lb. can, \$5.50.

X. L. ALL VAPORIZING COMPOUND. An English preparation for fumigating greenhouse. Bottle containing sufficient to fumigate 10,000 cubic feet, \$2.25; 20,000 cubic feet, \$4.00.

X. L. ALL LIQUID INSECTICIDE FOR SPRAYING. A Nicotine preparation. Pint, 65c.; quart, \$1.00; \frac{1}{2} gal., \$1.75; gal., \$3.50.

Ornamental Gardening in Europe, America and Japan, illustrated and described in

"PICTURESQUE GARDENS"

BY CHARLES HENDERSON.

Popular Edition Heavy Levant Paper Cover: 168 pages 9 x 11 inches; 349 photographic illustrations. Price, \$1.00 post paid.

This unique book mirrors the charms of the prettiest parks, lawns and gardens of Europe and America. The picturesque, the natural and the gardenesque adornments are reflected in over three hundred magnificent photographic illustrations from nature many of these views are 5 x 7 inches, some larger, few smaller; they are grouped and printed in a most artistic manner on heavy paper, with just enough text matter to describe the view and name the plants, vines, trees and shrubs needed to produce a similar effect or design.

There are in this country many lawns, gardens and grounds which the owners would improve and embellish, but they do not know exactly what they want, what would look well nor how to go about it, and it is for the benefit of such that we have prepared this book, for, although there are countless works of exhaustive precept on landscaping and gardening, there have been none issued so rich with illustrations of example. In it we force no particular styles or fashions, but describe and picture such a great variety of lawn and garden creations that some fruitful suggestions must be found adaptable to the environment of every home, whether pretentious or modest.

Those who are fond of improving and embellishing their gardens, lawns and grounds, or who are planning new ones, will get many valuable ideas from this beautiful book.

"Picturesque Gardens" is handsomely bound, and will grace any library table, even as an album of the beautiful in gardens.

Price, "Popular Edition" with Heavy Levant Paper Cover, \$1.00 Postpaid. Price "De Luxe Edition" on heavy plate paper, handsomely bound in cloth, with panel in colors, \$2.00 delivered free in the U.S.

GARDENING FOR PLEASURE.

By PETER HENDERSON. 404 pages fully illustrated. Price, post-paid, \$1.50.

Written for those desiring information on home gardening. Its scope therefore embraces directions for the culture and propagation of Flowers, Vegetables and Fruits. It has had a large sale, and gone through several editions, it exhaustively treats on the Vegetable Garden, Flower Garden, Fruit Garden, Greenhouse, Grapery, Window Garden, Lawn, the Water Garden, etc.

GARDENING FOR PROFIT.

By PETER HENDERSON. 375 pages, fully illustrated. Price, post-paid, \$1.50. If you wish to grow Vegetables for Sale, read GARDENING FOR PROFIT. The personal success of its author during his long career as a market gardener, and the success of thousands from the time he first made his cultural methods known up to the present day show the popular estimation of the value set upon this great work. While written particularly for the Market Gardener and Trucker, yet it is of equal value for large private gardens. It tells the whole story, from selection and treatment, of soils to marketing the produce; also covers the forcing of vegetables, strawberries, etc.

PRACTICAL FLORICULTURE.

By PETER HENDERSON. 325 pages, fully illustrated. Price, post-paid, \$1.50.

If you wish to become a Commercial Florist, then of all books you should procure PRACTICAL FLORICULTURE. We have any number of complimentary letters from people who actually knew nothing of the florists' business, but who followed the instructions in this work and are now "full fledged florists." And although written especially for the Commercial Florist, it is equally valuable to the amateur and all having conservatories, greenhouses, window gardens, etc.

HOW THE FARM PAYS.

By PETER HENDERSON and WM. CROZIER.

400 pages. Profusely illustrated. Price, post-paid, \$2.00.

An acknowledged authority for farmers. Gives practical Methods of Growing Grass, Grain, Root Crops; Fruits, etc.. and all about Stock, Farm Machinery, etc. It is written in a plain and easy-to-be-understood language. Everything pertaining to scientific or abtruse subjects has been ignored, the information given being the most direct to make the work of the farm pay.

HENDERSON'S HANDBOOK OF PLANTS, AND GENERAL HORTICULTURE.

By PETER HENDERSON.

536 Pages. Profusely Illustrated. Price, post-paid, \$3.00

The standard American dictionary of plants, flowering, ornamental, economic, etc., including vegetables and fruits, in fact, a complete work on cultivated plant life. Everything is arranged alphabetically and very complete descriptions are given, with full cultural instructions for everything of importance. A full list of popular names and all botanical terms are given; also a glossary of the technical terms used in describing plants. A monthly calendar of operations for the greenhouse and window garden, flower, fruit and kitchen garden, renders it valuable as a book of reference; in short, there is sufficient matter given on all gardening subjects to allow this book to be termed The American Gardener's Dictionary.

HENDERSON'S BULB CULTURE.

68 pages, profusely illustrated. Price, postpaid, 50c.

This gives the up-to-date methods of treatment for all kinds of Hardy and Tender Winter, Spring, Summer and Autumn Flowering Bulbs, Tubers, Corms, etc.—Bulbs for Gardens and Lawns—Design Bedding—Mixed Borders—Naturalizing—Situations, Soils and Preparation—Time and Depth to Plant—Treatment after Flowering—Bulbs for the House and Greenhouse—Forcing—Flowering Bulbs in Glasses of Water, etc.—Keeping Dormant Bulbs—Hints on Buying and Selecting for Different Purposes, etc.

CULTURE OF WATER LILIES AND AQUATICS.

Revised and enlarged edition. Profusely illustrated. Price, post-paid, 50c.

This gives the latest methods of growing and flowering Nymphaeas, Nelumbiums, Victorias and all other Ornamental Aquatics, both in natural and artificial ponds, pools, tanks, etc.; including suitably situated natural waters—Making Artificial Ponds, etc.—How and When to Plant—Proper Depths—Soil—Wintering Tender Species—Propagation from Seeds and Otherwise—Bogs—Marginal Plants and Planting—Descriptions of Varieties—Aquaria Plants, etc.

Special Offer: If ordered at one time, we will supply the full set of above eight Books, including the DeLuxe Edition of "Picturesque Gardens." (Separately, they would cost \$12.50.) Carriage prepaid, for \$10.00

HENDERSON'S AUTUMN CATALOGUE. BULBS :: PLANTS :: SEEDS :: ETC.

FOR FALL PLANTING.

BUSINESS RULES.

WE DELIVER FREE IN THE U.S., except where otherwise noted in this catalogue (By Parcel Post, Express or freight at our option.)

VEGETABLE AND FLOWER SEEDS. By the packet, oz. 1 lb. and lb. MOST BULBS AT THE SINGLE PRICE, AND LAWN GRASS SEED.

Purchasers pay transit charges on bulbs and roots in quantity when specially noted in this Catalogue, also on seeds in pints, quarts, pecks, bushels, barrels, and on Farm Seeds, Implements, Fertilizers, Insecticides, etc.

Plants by express we do NOT deliver free: purchaser pays express charges, though small plants can be mailed free when so ordered. See page 41.

THE PRICES QUOTED IN THIS CATALOGUE ARE NET-We offer no premiums discounts or gratuities. This list cancels all previous quotations.

WE CANNOT GUARANTEE THE RESULTS of any seeds, plants or bulbs we send out-therefore

PETER HENDERSON & CO. give no warranty express or implied, as to description, quality, productiveness, or any other matter of any Seeds, Bulbs, or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

HOW BEST TO ORDER AND REMIT.

Remittances should be made either in the form of an Express Money Order or a P. O. Money Order, Bank Draft or Registered Letter.

Customers can also shop by express, as all express companies have purchasing departments in all their offices. They make no charge other than the return expressage.

If Goods are Wanted (by Parcel Post or Express) C. O. D., 25 per cent., of the amount must accompany the order. Plants we do not send C. O. D.

Orders from unknown Correspondents, without remittances, should be accompanied by New York City reference, to save delay.

CUSTOMERS PLEASE TAKE NOTIGE

IF GOODS ARE WANTED BY PARCEL POST, POSTAGE MUST BE ADDED AS PER TABLE BELOW, EXCEPT FOR THOSE WE OFFER TO DELIVER FREE AS ABOVE.

REGARDING DOMESTIC PARCEL POST within the United States and Possessions-which now includes Seeds, Plants, Bulbs and Roots.

WEIGHT LIMIT-The weight limit within the 1st and 2d Zones is now fifty (50) pounds, within the other Zones the weight limit is twenty (20) pounds and the size limit seventy-two (72) inches for combined length and largest girth. At the end of the descriptions of the Bulbs and Roots we offer in this catalog will be found weight per dozen, per hundred, or per thousand, as the case may be and customers can add up to the total weight of their order, and add postage according to zone rates below, or obtain the rate from their postmaster by giving him the total weight. For packages in excess of 20 lbs. in weight, the express rates are much lower, so we recommend the use of the express wherever possible. The charge is the same collect or prepaid.

Peter Henderson & Co.,

35 and 37 Cortlandt Street,

NEW YORK.

From PETER HENDERSON @ CO., NEW YORK

The "Henderson" Lawn Grass Seed is in reality as cheap as any other, notwithstanding its superior quality, for, while, many mixtures on the market weigh only 14 pounds to the bushel, the "Henderson" Lawn Grass Seed weighs 20 pounds per measured bushel, being entirely free from chaff and other foreign matter. DELIVERED FREE IN THE U. S. (By parcel post, express or freight, at our option.) 30c. per qt., 55c. for 2 qts., \$1.00 for 4 qts., \$1.75 per pk., \$6.00 per bus.

HENDERSON'S LAWN GRASS MIXTURES FOR SPECIAL SITUATIONS.

free in the U.S.
